

# TRI-COUNTY SWINE SYSTEMS

## Pax HOG & STEER FEEDERS

IN STOCK

## Pax BULK BINS

Available in Sizes From 3 to 25 Tons

3 TON TO 9 TON IN STOCK

★ DEALERSHIPS AVAILABLE FOR PA AND NEIGHBORING STATES

## SILVER LINE CONFINEMENT EQUIPMENT

★ FINISHING FENCING

★ NURSERY CAGES

★ SUPPORT FRAMES (Raised Decks)

★ QUICKSIDE CRATE

## SCHULD BINS

EXTRA DISCOUNTS THRU NOVEMBER  
STOCKING 3 SIZES:  
4½, 7 & 9½  
Ton Bins  
Other Sizes Avail.

## 'MARTIN-AIR' PATENT PENDING Fully Automatic Total Confinement Ventilation Systems

### Why The 'Martin-air' System is best for you

The success of Martin-air systems rests on a different concept than that used by most ventilation designs. Others work by exhausting air completely then drawing cold air from outside—usually at the other end of the barn. Martin-air units use an exclusive damper system which mixes fresh air and exhaust air so the output of the unit is never more than 4°F different from the room temperature. And, at any given spot in a properly designed barn, the temperature should seldom vary more than 1°.

The Martin-air principle is simple and effective. Thermostats control fan speed and a dampered mixing chamber to blend fresh air with warm air. Constant circulation throughout the building maintains uniform temperature, eliminates drafts and reduces condensation to provide a dry environment.

A unique air blending process provides even temperatures and controlled, draft-free air flow.

- Reduce animal stress
- End temperature fluctuations
- Reduce drug costs
- Reduce incidence of pneumonia and disease
- Reduce labor
- Lower condensation
- Confine manuring

### 'Martin-air' can fill your specific needs

No matter what your livestock confinement requirements, a Martin-air System can be designed and installed to fulfill your needs. Systems are designed to create a stable, draft-free environment based on building architecture, insulation, number of animals, and all heat sources. Successful installations are operating in many calf barns, dairy houses, hog, poultry and rabbit operations and even horse barns.

Martin-air units are available in a wide range of ceiling or wall-mount models and each installation is carefully designed by ventilation specialists.

Martin-air ventilation can be installed in any existing building you may be using for livestock confinement, even old bank barns.
