

OPEN HOUSE

At
Bowman's Poultry Farm
 RD 4, ALBION, N.Y.

THURSDAY, NOVEMBER 6, 1980
 From 2 PM to 6 PM

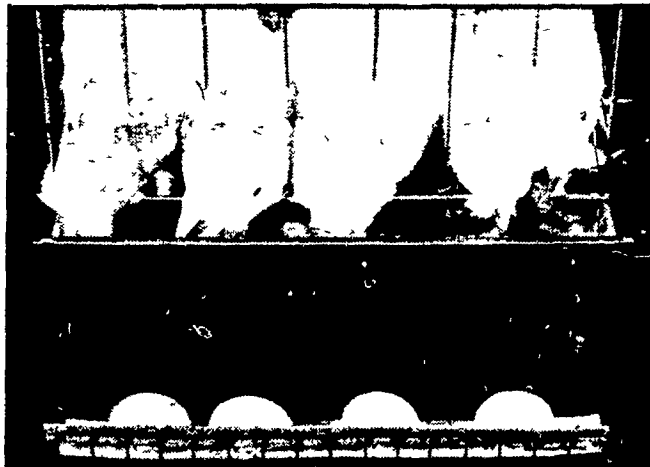

Featuring

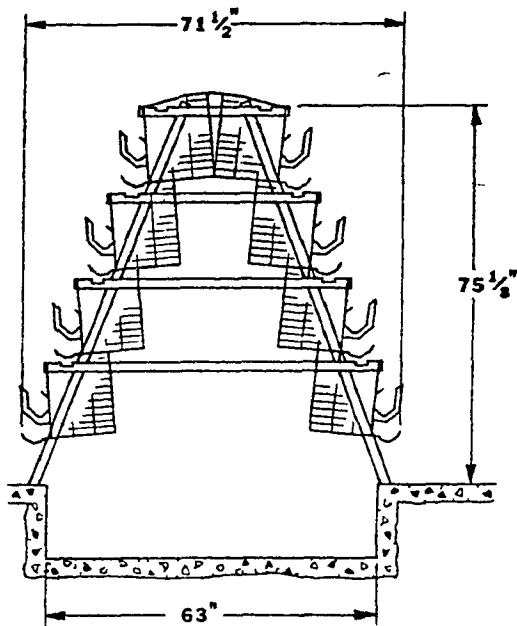

CAGE LAYER SYSTEM

★ LESS BIRD STRESS

The system has been designed for bird comfort! Each bird has her place at the feed trough. Each has easy access to water. Obstruction to light and the flow of air have been greatly reduced, providing more uniform ventilation and lighting for every bird. Combined with Chore-Time's automatically controlled air inletting system, you get a layer house environment designed for bird comfort and the resulting better production.

★ NO DROPPING BOARD SCRAPER

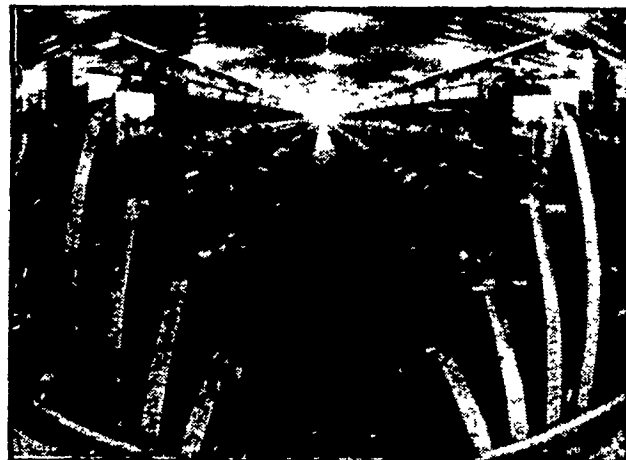

It requires no dropping boards or scrapers. It is available in either three-hi or four-hi models, with the four-hi configuration providing the same bird density per square foot of building space as do conventional three-hi systems, without increasing building costs

OUR BUILDINGS ARE COVERED WITH:

REYNOLDS ALUMINUM

★ MINIMIZES FEED WASTE

Not only the physical shape of the feed trough, but the operation of the feeder has been engineered to reduce feed waste. The trough shape cuts down on feed loss from "raking" and "billing," while the feeder has been specifically designed for Chore-Time's programmed and performance feeding concept.
