AGRI-EQUIPMENT, INC.

Is An Authorized Distributor For

Infrared Brooders For Hogs

Sunnypigs are made of stainless steel. Their three-level radiating surface (a patented combination of ceramics, nickel chromium mesh and directional fins) is an efficient generator of radiant heat. They come equipped with a support consisting of five-foot chains, a flame safety device, a very effective primary air filter (patented) and a replacement filter. The filter should be cleaned at regular intervals, a little work that will save you a lot.

SBM brooders now have the "Seal of Quality" by the Farm Equipment Manufacturers Association.

No other gas brooder on the market has FEMA recognition and your clients should feel that the Seal of Quality means that the SBM brooder is a serious product, backed up by technical information and the Distributors know their products and give solid after sale service.

**SBM:
Downgoing
Heat**

Sunnypig 3 for ambient heating of a farrowing pen or 20 to 30 weaner pigs.

Sunnypig 1 to heat a litter of piglets or a pen of 10 to 12 young pigs.

- Energy savings - SBM Brooders save as much as 10 to 25%
- A spectacular drop in mortality — Piglets are practically blind for a few hours following birth. Only the powerful heat radiated to floor level by Sunnypigs attract the piglets to the warm area (which is warmer than their mother).
There, the piglets run no risk of being crushed by the sow. Cannibalism is practically non-existent. The piglets are quickly dried and warmed up.
Furthermore, because the heat that descends warms the floor more than the air, the piglets sleep on a dry, healthy floor, reducing the risk of disease.
- SBM Brooders: High heat efficiency at floor level for your piglets — Sunnypigs are so effective that even in very cold areas ambient heating is necessary for only a few months a year. This can be provided by Sunnypig 3 brooders (in very cold areas, one Sunnypig 3 for four pens).

**SBM Brooders:
In Use In All Types
of Growing Facilities.**
