

The Surge STO. Rugged telescoping arm for better support, positioning and smoothness.

Rugged and reliable. That's what dairymen asked for in an automatic take-off.

The Surge STO (Simultaneous Take-Off) fills the bill with a precision engineered telescoping arm. The rugged arm supports the milker and can be adjusted individually to each cow for effective milking action.

When the cow is milked out the sensor shuts off the milking vacuum and signals the STO arm to telescope into itself and pivot out from under the cow in one smooth, gentle motion.

Available with electronic or mechanical float milk-flow sensing.

Call us today. We'll tell you more about how this rugged automatic take-off can save you man-hours, make your job easier and help you avoid overmilking.
