

NEW PROFILES OF PERFORMANCE

Here's 80 hp with bonus pulling power: the John Deere 2940 with front-wheel-drive option

The new John Deere 2940 not only offers new features to increase performance, it also offers a front-wheel-drive option that's a real performance booster. A beefed-up 6-cylinder engine, the new synchronized TSS transmission and Hi-Lo shift as standard equipment for 16 forward and 8 reverse speeds, larger fuel tank capacity, hydrostatic steering, new electronic instrument panel and a new completely adjustable seat all add up to performance. Add the front-wheel-drive option, and you're ready for soft, sandy or wet conditions. And you can engage or disengage front-wheel drive on the go. For bonus pulling power, check out the John Deere 2940 equipped with the front-wheel-drive option. You'll like what it can do for you.

NEW HYDRA-PUSH™ SPREADER DESIGN HELPS ELIMINATE FREEZE-UP PROBLEMS

John Deere introduces a better way to spread manure—the new 450 Hydra-Push Spreader with 217 cu. ft. capacity (heaped, single beater). Hydraulic pushoff design replaces the conveyor chain, thereby eliminating the chance of conveyor chain and flights freezing down during cold weather spreading. Piggy-back hydraulic cylinders move the front part of the floor and blade, pushing and carrying manure to the beater. The cleanout stage is eliminated, so you can finish spreading faster than with conventional spreaders. Sides and floor on the Hydra-Push Spreader are bonded with a corrosion-proof material—manure won't freeze or stick to it. Spreader sides and floor are scraped clean as the blade moves the load to the beater. The 450 Hydra-Push spreader has fewer moving parts than conventional spreaders, minimizing maintenance. Stop by today and see the new 450 Hydra-Push Spreader.

Versatility

Pure and Simple

John Deere "Little-Big" Diesel Tractors

John Deere "Little-Big" Tractors are basic, simple machines designed for easy upkeep, easy operation. Tractors that take a turn at mowing, loading, digging postholes, dredging ponds, plowing and planting... then come back for more. Choose from the 850, 950 and 1050, with respective horsepower of 22, 27 and 33 at the PTO*. All have a 3-cylinder diesel engine, 8-speed transmission and differential lock. Plus Category 1 3-pt. hitch (load and depth sensing on the 1050), 540-rpm PTO (continuous-running on 1050). The 1050 also has a turbocharged engine. Both 1050 and 950 are available with mechanical front wheel drive. See us today for a demonstration. Check out our line of tractor-matched implements.

* Maximum PTO hp at 2600 engine rpm for 850, 2400 engine rpm for 950 and 1050 by official test.

Grinders built for tractors over 100 hp

Team a high-horsepower tractor and a 700/750 Grinder/Mixer and you'll spend less time grinding. Save more time for other jobs. John Deere engineers designed the 700/750 Mixers to work with tractors up to 155 horsepower with 1000-rpm PTO to keep rations moving. See us soon for a John Deere 2 or 3-ton Mixer.

506 and 606 feature Unibody™ design in a utility-type rotary cutter

If you're in the market for a really tough utility cutter, stop by and take a look at the 5 foot 506 or 6 foot 606 Unibody rotary cutters. Multi-purpose blades and a "stump jumper" blade holder are only a few of the many heavy-duty features you'll like in these new cutters.

Put warmth where you want it with a John Deere Space Heater

Three models are available to heat machine sheds, workshops, cabins anywhere. 115-volt current is available. Chrome handles and easy-rolling wheels make these heaters truly portable. All burn kerosene or No. 1 or No. 2 fuel oil. Fuel-saving thermostat is standard on 150,000-Btu model, optional on 50,000- and 90,000-Btu models.
