

MOVE GRAIN WITH AIR

- Save Money & Labor
- Utilize existing flat storage

We have PTO or self-powered units with a wide range of capacity.

Put your farm buildings to better use by storing grain in them. Buy a Neuro pneumatic grain conveying system to blow grain into, and vacuum grain out of, flat storage. One man can operate a Neuro system. Go anywhere with a Neuro... it's portable and versatile. We can show you several more good reasons why a Neuro pneumatic grain handling system is your best investment. Let us demonstrate a model on your farm. Contact us this week for full details.

ATTENTION FARMERS! ADVANCED AG SYSTEMS INTRODUCES CIRCLE STEEL BUILDINGS

DO YOU REALLY NEED A STORAGE BUILDING THIS GOOD?

If you could afford a new building every 10 years, a Circle Steel building wouldn't be necessary. But most farmers make an investment in a building that will last longer than 10 years...many are investing in Circle Steel to get that longer life with less yearly maintenance.

If you want long-term return on your building investment, make it a Circle Steel...from

Letters To The Editor

Dear Editor:

Your Editorial, Nov. 1, 1980, on SMV violations is an example of the kind of reporting that is the crux of our problems, in our society. You are right in your observations on the public highways and right of ways.

You are wrong in your observations on private property.

I believe that even if a person is basically wrong on their own (or leased) property, it is none of any other person's business.

In some types of government, people, like yourself, would be rewarded for their observations and reporting of a violation on another person's property. I hope that we still have a free society and that people who mind other people's business are put down and not rewarded.

I believe property rights are the place where people should be able to express their rights and freedoms, even if not done properly or in accordance with the law, unless it directly interferes with an adjoining property.

After all if we can't express our freedoms on our own property, where else can we express our freedom? Or are, our freedoms just a figmentation of our minds and government?

Daniel M. Groff
Lititz

"Harvestall Chillcuring works.

Clarence Harnish, Lampeter, Pa.

This was my first year with the Harvestall. When my corn was dried commercially last year it cost me 27¢ per bushel. With the Harvestall it didn't cost over 6¢ per bushel and the test weight was 58 to 59 lbs.

I'm pleased with the quality corn I get and I'm pleased with the savings. I would recommend the Harvestall system to farmers who are looking for storage or drying because it has done for me the job it was designed to do.

I get
better
quality
corn for
less
cost."

**The Harvestall
Chillcuring System**

It's simple. When grain comes out of the field it's a living seed. So instead of destroying the seed with high heat, moisture is removed with natural air ventilation. The grain keeps all its feed value, there is less shrinkage than with heat drying because only moisture is removed, not dry matter. You'll never see white dust in Chillcured corn. You actually save half of what you're used to losing in heat shrink.

There's no gas or oil to buy. Natural air carries away heat and moisture as the corn releases it.

Harvestall Chillcuring is a back-to-basics system that just simply makes good sense. Find out more about it.
