

Who won the showdown between Pioneer, Funks, DeKalb and Jacques?

Showdowns aren't just at the OK Corral. This one took place at 517 locations throughout the corn belt. Look what happened!

Haven't you always wanted to see how the major hybrid corn varieties compared?

That's what Jacques has done again this fall in 517 locations all across the corn belt.

Major competitive varieties were planted alongside Jacques varieties and harvested for the whole world to see.

What's even more important all the results are published whether we won or lost. Who else runs corn trials where they put their hybrids up against the strongest competitors and then tell when they lose?

But isn't that what you need for a true test of hybrids?

Look at the way farmers run our plots? They plant field length rows, they combine just like you do, corn is weighed and

moisture tested as neighbors and competitive seed dealers watch. So you know the results have to be right.

What happened in the tests? The chart at the right tells the story. They show how well Jacques varieties did against Pioneer, Funks and DeKalb. All the results aren't in yet but when they are we'll show you who won and lost in the showdown for your area.

What better information can you use in evaluating this past tough year? What better way can you find the ideas on the hybrids you need to consider adding for next year?

So here are the first shots in the showdown. In a few more weeks all the results will be in and our new 1980 Yieldbook will be ready. See your Jacques Dealer for a copy or send in the coupon and we'll mail you a free copy. Do it right away.

1980 Field Shelling Trial

David H. Wenger
Lititz, Pennsylvania

Planted: May 24 1980 in 30 inch rows
Fertilizer: 300 lbs 20-0-14 plowdown 175 lbs 6-29-11 plus trace elements starter 60 lbs actual N as Ammonium sulfate
