WOULD YOU BELIEVE...

Stomach and intestinal worms can cause severe loss of blood. With heavy infestations, animals can lose more than a quart of blood a week!

TRAMISOL* dewormer not only controls stomach and intestinal worms, but all nine major worms in cattle. And TRAMISOL comes in injectable, bolus, drench and manufactured-feed forms. TRAMISOL It gets the worms worth getting. One way or another.

How many calves did you lose last year?

Fiberdome CALFhutches start them out right

Raising calves is a tricky business. That's why modern calf raisers are going to individual hutches to help save more calves by cutting down on pneumonia, scours and hoot problems. Properly made hutches help eliminate the dampness, crowding and poor ventilation that plague many calf barns.

You can be assured of this kind of healthier environment with Fiberdome CALFhutches. Their unique one-

piece construction of heavy gauge fiber glass makes them weatherproof, so they will last indefinitely with normal care. No joints for moisture and bacteria to creep through. A white gel-coat finish keeps them cool in summer.

When not in use, stakes can be removed and strong U-bolts on top let you conveniently pick units up to clean or stack for compact storage.

Receive FREE feeding unit with the purchase of each Fiberdome calf hutch. Offer expires January 31, 1981.
