

## Corn irrigation meeting set for next Monday

DOVER, Del. — With some Delaware Farms last summer, a lot of growers are

interested in learning more about successful irrigation of corn and other agronomic crops.

This year's Delaware Corn Irrigation Meeting will be held Monday, November 24, at the Sheraton Inn in Dover.

Subjects to be covered at the meeting include: the nuts and bolts of irrigation systems - a telelecture by Paul Fischbach of the University of Nebraska; planning your first irrigation system; irrigation of soybeans and small grains; and an update on the Delaware Corn Irrigation Program, with emphasis on management practices which contributed to the achievement of this summer's record 291 bushel yield.

There will also be a presentation of irrigated corn grower awards by Governor Pierre S. duPont IV.

The meeting starts at 8:30 a.m. with exhibits, coffee and donuts and adjourns at 3:30 p.m. For further information check with Delaware county agents. The meeting is being sponsored by the Delaware Extension Service.

NEUERO

# NEU-VEYORS

Select from several air-conveyor models for PTO or self-powered operation. There's a size to fit your volume needs.

Move grain or feed the easy, modern way with air! A Neuero NEU-VEYOR System offers many advantages over legs, augers, drags, sweeps, ideal for loading or unloading flat storage!

- 1 No dust! Eliminates choking dust dangers.
- 2 Safer! No danger from augers, sweeps, etc.
- 3 Boost grain quality! Aerates... less breakage.
- 4 Versatile! Portable... goes anywhere... more uses.
- 5 Gear Driven! More dependable than belt-driven.
- 6 Less labor! One man operates... saves wages.
- 7 Handier! Picks up spills... cleans out remote areas.
- 8 Low maintenance! Engineered for lifetime use.
- 9 The answer to flat storage problems.

See us for complete details on a Neuero NEU-VEYOR System to fit your needs now and for the future. Ask us for a demonstration.

## ATTENTION FARMERS! ADVANCED AG SYSTEMS INTRODUCES CIRCLE STEEL BUILDINGS

## DO YOU REALLY NEED A STORAGE BUILDING THIS GOOD?

If you could afford a new building every 10 years, a Circle Steel building wouldn't be necessary. But most farmers make an investment in a building that will last longer than 10 years...many are investing in Circle Steel to get that longer life with less yearly maintenance.

If you want long-term return on your building investment, make it a Circle Steel...from

## "Harvestall Chillcuring works.

It is the  
most  
profitable  
part of my  
operation."

The Farmers' Grain Guardians

CHILLCURING  
IMPROVED

FARMERMENT

**HARVESTALL**

CENTRAL CONTROL

**GREG ESHELMAN**  
Mohnton, PA

I really couldn't be more satisfied. First of all I like the efficiency at harvest. With just two of us working the entire harvest was non-stop.

Then the 5¢ per bushel curing cost even included power for installation and our night light.

My buyer was quite impressed with my corn. Test weight was from 57 to 58 lbs. That means I got an extra \$300 per 25 ton truck load. Even the drivers commented on the good quality.

I'm an Ag Engineering student at Penn State, and we do a lot of work with drying systems. Out of curiosity I ran the Harvestall design through our computers and found that for the most important aspect of drying, air flow, the Harvestall bin is the optimum design.

Actually, the Harvestall is the most profitable part of my operation. With better marketing control I make an extra dollar per bushel. For the farmer who needs storage or drying, the Harvestall Chillcuring system is the best investment I can think of.

### The Harvestall Chillcuring System

It's simple. When grain comes out of the field it's a living seed. So instead of destroying the seed with high heat, moisture is removed with natural air ventilation. The grain keeps all its feed value, there is less shrinkage than with heat drying because only moisture is removed, not dry matter. You'll never see white dust in Chillcured corn. You actually save half of what you're used to losing in heat shrink.

There's no gas or oil to buy. Natural air carries away heat and moisture as the corn releases it.

Harvestall Chillcuring is a back-to-basics system that just simply makes good sense. Find out more about it.
