

Why be troubled with a tank mix?

Double-Duty Bicep does it all.

**The control of a tank mix in corn.
Without tank mixing.**

That's because Bicep® is the Double-Duty corn herbicide.

Bicep controls the grasses your grass herbicide controls. And Bicep controls the broadleaf weeds your broadleaf herbicide controls. Without mixing different herbicides.

Gone are the uncertainties of tank mixing. The doubts about separate product compatibilities.

The calculating, measuring and pouring from different cans and bags.

And you'll find Bicep mixes easily with water or liquid fertilizer, too.

Bicep can be surface applied or incorporated. It's safe to corn and can be used without carryover problems in fields rotated to soybeans.

So in the Spring, why be troubled with a tank mix? Double-Duty Bicep does it all.
