

THE NEW IRON HORSES

MORE HORSES MORE IRON

More strength throughout from more iron within

The drawing above gives you a good idea of where John Deere engineers concentrated their efforts when this whole line of tractors was redesigned. As you can see, practically everything but the paint was beefed up in the revision.

Stop in and we'll "walk you through" the iron story on the tractor size of your choice: 90-hp 4040, 110-hp, 4240, 130-hp 4440, 155-hp 4640, or 180-hp 4840. We've got all the facts on the NEW IRON HORSES — the tractors with more horses and more iron.

GRINDERS DESIGNED FOR THE EVERYDAY GRIND

John Deere engineers designed the 700/750 Mixers to withstand tough grinding. These mixers come equipped with a 1000-rpm PTO, 20-inch-wide hammer mill, 64 hammers, and a 703-square-inch screen to allow feed to be ground fast. See us today for a 2- or 3-ton mixer.

Versatility

Pure and Simple

John Deere "Little-Big" Diesel Tractors

John Deere "Little Big" tractors are built to handle a number of jobs, using just a fraction of the fuel often required of larger tractors. They're basic, simple tractors designed for easy upkeep, easy operation. Tractors that take a turn at mowing, loading, digging postholes, dredging ponds, plowing and planting ... then come back for more.

And there are three models to choose from — the 850 with 22-PTO hp, the 950 with 27 PTO hp and the 1050 with 33 PTO hp*. All have a 3-cylinder wet-sleeve diesel engine ... 8-speed transmission ... differential lock... color-coded controls ... and more. The 3-pt. hitch handles Category 1 implements ... and features load-and-depth control on the 1050. The 540-rpm PTO (continuous-running on the 1050) engages with a conveniently located lever.

The 1050 is turbocharged for more power, smoother operation. Both the 1050 and 950 can be equipped with mechanical front-wheel drive for added traction.

If you need a compact tractor that doesn't require a degree in advanced mechanics to service and operate, see us today. We have a "little-big" tractor, plus the implements you need for your particular operation.

*Maximum PTO horsepower at 2600 engine rpm for the 850 2400 engine rpm for the 950 and 1050 by official test
