

How did Pioneer 3591 and DeKalb XL-55a do against Jacques JX180?

Our new Yieldbook shows you the results of Jacques hybrids against top competitive varieties. Most tests have at least one main Pioneer or DeKalb number.

You can't decide whether to plant one of these two old standbys next year without comparing them to possible replacements like Jacques.

We give you the information you need to do just that. The tests of our hybrids against top competitors make the hottest reading in the corn belt.

These tests are run just the way you would want: field length rows combined and moisture-tested out in the

open and the results published for everyone to see — even when we lose. Is there any other company that you know of that does all that?

Send for your free 1980 Yieldbook now. Then sit back and study how your present hybrids did and which ones may need to be weeded out.

We bet you'll find an hour spent on this will make you more money than any other hour you can spend. Send in the coupon right now.

1980 Field Shelling Trial

**Fred Bechtel
Curryville, Pennsylvania**

Planted: May 5 1980 in 34 inch rows
Fertilizer: 100 lbs actual N as Urea plowdown 200 lbs 10 20-10 starter
