"THINK SPRING" SPRING SPECIALS

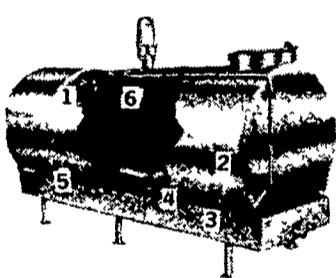

D-4 GIRTON MILK TANK

DIPLOMAT

AMBASSADOR FEATURES

- 1 Polyurethane foam in place insulation
- 2 All stainless steel construction
- 3 Box type frame runs the entire length of the tank to carry the weight of the tank to insure calibration accuracy
- 4 Thermal barrier between frame and inner tank insures no heat loss from metal to metal contact
- 5 Evaporator plate is specially designed to maintain maximum efficiency with the full flooded system
- 6 Built in washing system with all stainless lines and built in washing head

MASTER CONTROL PANEL

The new Solid State Control included with all Girton Model D5 Farm Tanks

LIGHTS — Tell at a glance what mode the system is in or what's happening. Separate lights indicate

- Cool Mode
- Wash Mode
- Compressor Running
- Agitator Running
- Washing
- Cold Water Connection
- Hot Water Connection
- Washer connection to the tank
- Detergent Solution Jar
- Acidified Rinse Solution Jar (Also may be used for sanitizing solution)

Solid State Digital Milk Temperature Indicator
 Separate fuses to protect washing and cooling sections of the control system

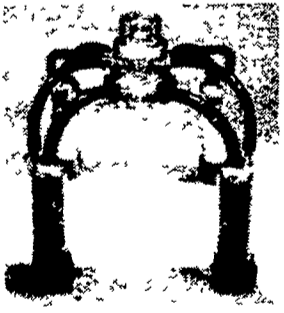

WASH More functional control by rotating the dial from Off to On. The system will automatically proceed through pre-rinse with cold water, rinse with warm water, wash with hot water and detergent, rinse with rinse solution and shut-off before milking. The dial can then be turned from Off to Sanitize and the tank will be sanitized automatically before the beginning of the milking period.

AGITATE — When the milk is cool and the compressor is not running the agitator can be operated from 0 to 120 minutes by rotating the dial for the desired time of operation.

SELECTOR SWITCH Activates either cooling or washing system. Impossible to start washing when the system is in the cooling mode.

BODMIN NU-PULSE SYSTEM
