

## Juniata County DHIA Monthly Report

December 1980

The December 1980 report of the Juniata County Dairy Herd Improvement Association is as follows

Records were calculated for 4253 cows in 80 herds. The 10 high herds in average butterfat production per cow per day are listed below. Owner's name and address, number of cows, average daily pounds milk and butterfat per cow, are given in order.

Clyde D. Moyer	45	53.2	2.24
Roy & Glenn Henry	62	54.2	2.05
Rick & Ralph Saner	49	54.0	2.05
Freeburn & Norman Love	49	51.7	1.97
Zimmerman Brothers	76	50.0	1.95
Harold B. Shearer	39	48.9	1.95
James C. Graham	33	49.7	1.93

ISKCON Farms 12 40.4 1.91  
 Marvin E. Pontius 30 49.1 1.91  
 Marvin E. Pontius 33 48.9 1.89

Two hundred fifty eight cows completed lactations records of 305 days or less. Two of these cows produced over 1000 pounds of butterfat, three produced over 900 pounds, nine produced over 800 pounds, 21 produced over 700 pounds, 50 produced over 600 pounds, and 67 produced over 500 pounds.

The 15 high cows are listed below. The owner's name, cow's name, pounds milk and pounds butterfat are given in order.

Freeburn & Norman Love	178	26,880	1196
100		23,260	833
Mark L. Zook			
Patsy		24,068	1091
Clyde D. Moyer			
Astro		25,495	958
Marigold Knob Farm	8	21,568	919
Rick & Ralph Saner			
Sally		21,610	910
Lady		20,705	857
Glen B. Simonton			
70 Shar		18,409	890
James H. Speer Sr			
Winnie		19,779	878
Harold B. Shearer			
Dolly		19,343	873
Roy & Glenn Henry			
Chocolate		22,894	865
Depew Brothers	111	17,922	855

## Farmers looking to no-till

LEBANON — Predictions of continuing dry weather are causing more farmers to consider no-till farming reports Karl Hellerick, Soil Conservation Service, Lebanon County.

"This past year some of the best corn yields were obtained using no-till which allows the sod or crop residue to remain on the surface," he said.

Mulch reduces evaporation loss. Conventional plowing buries vegetation and exposes plowed soil to the effects of sun and wind.

"It takes less fuel to no-till plant," said Hellerick, "then plowing. And everyone is concerned about the higher fuel costs."

Hellerick recommends first time users try only a part of their crop in no-till, and work with a neighbor who has been using this method.

"No-till farming takes excellent management," concluded Hellerick, "but the potential for higher yield and more profit is attracting the interest of corn and soybean producers."

# WIC BEDDING CHOPPER

## No Competitor Can Beat The WIC CHOPPER For Performance And Cost

The Wic bedding chopper chops straw, hay or corn fodder and spreads it uniformly under your cows, all in a single operation. When you use chopped bedding, you save on straw and your cows stay much cleaner. On top of that, cleaning up is a breeze...

All models of Wic's bedding chopper have four rows of knives insuring a better spreading action.

Wic has also foreseen an adjustable grill, in 5 positions to avoid overloading the motor while using different bedding such as damp straw, old hay, etc.

With a simple adjustment that either speeds up or reduces the rotation of the tub, you can cut the bedding to the desired length. Wic the futuristic chopper now!

**FRAME** steel monocoque paint  
**BARREL** plastic 3/16" thick  
**WHEELS** 2 pneumatic of 16"  
**WHEELS** 1 swiveling  
**BRAKE** on wheel swiveling  
**CAPACITY** 1 bale/50 seconds approx  
**DIMENSIONS** width 31" (80 cm) (with out handle) length 45" (115 cm)  
**DIMENSIONS** height 55" (140 cm)  
**WEIGHT** 440 lb (200 kg)

### WIC MOTORIZED SILAGE WAGON WITH HYDROSTATIC SPEED CONTROL

- ★ Regular Feed Discharge or 40" High Feed Discharge
- ★ Electric or Gas Operated

#### ELECTRIC BEDDING CHOPPER

Wic also makes an electric 200 volt a.c. chopper or a 24 volt d.c. battery operated chopper including an automatic charger. These two models are equipped in the factory with a manual starter panel and are protected by fuses to diminish risk of accidents.

Very quiet, these bedding choppers are mostly used on small or medium sized farms. As well as being mobile, the 220 volt a.c. model can be installed stationary. Motor: 220 vol. a.c. 3 h.p. 24 volt d.c. 2 1/2 h.p.

#### GAS BEDDING CHOPPER

The gas powered bedding chopper is the most popular on the market. Its operation is simple and it handles easily. Equipped with a Honda 4 stroke gas engine, the Wic bedding chopper insures maximum output while in use.

Motor: 5.7 or 10 h.p. 4 stroke Honda  
 Starter: 5 h.p. manual and 7 and 10 h.p. manual or electric start.

#### POWER TAKE OFF BEDDING CHOPPER

Wic has perfected a three point hitch PTO chopper activated by the power of your tractor. Easy to install, it is ideal for free stalls, or in strawberry fields for mulching purposes.
