

# 90-hp 4040

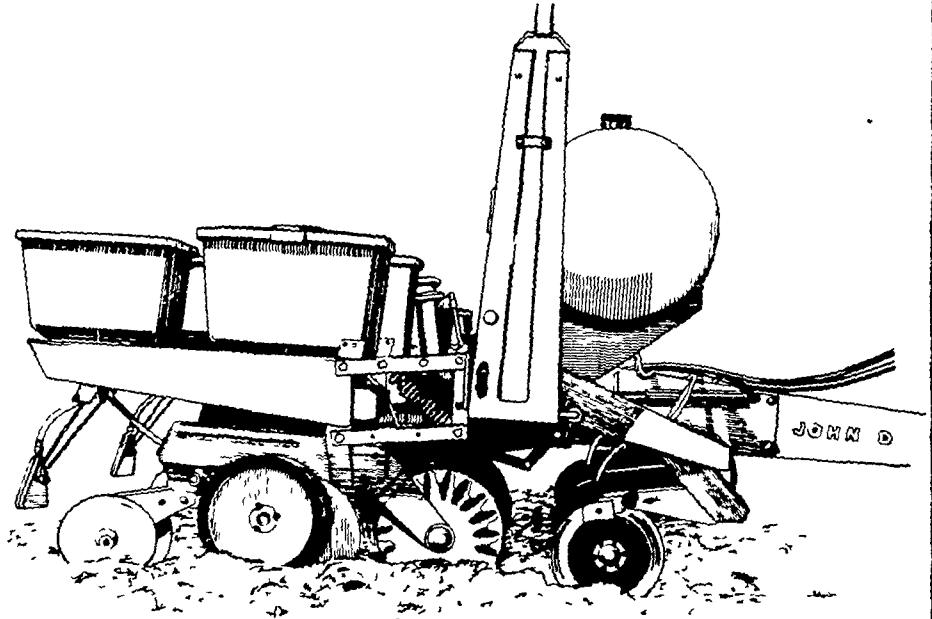

## Quick handling with a powerful punch

If you're looking to pick a fight with tough soil, you'll like the powerful punch served up by our trim 4040. A John Deere-built 404-CID 6-cylinder diesel packs the muscle.

If you also have to pick your way around a crowded barnyard, you'll like the quick handling provided by our famous hydrostatic power steering. See us for all the details.

## Save fuel, time, moisture and soil with John Deere's Max-Emerge™ Conservation Planter

John Deere's Max-Emerge Conservation Planters, available in 4-row adjustable (30- to 40-inch rows), 6-row narrow or wide, and 8-row narrow models, give you a rugged planter you can rely on in conditions like sod or stubble.

Heavy-duty springs help transfer weight from the 7x7-inch frame to each planting unit to keep coulters in the ground. The coulters, fluted or ripple, cut in a path ahead of the Tru-Vee™ opener with the cutting depth of both controlled by the depth-gauging wheels. Optional cast-iron firming wheels firm soil around seed in extra-tough conditions.

Whether you would like to try minimum- or no tillage planting, stop in for more information on the Conservation Planters from John Deere.

# Versatility

Pure and Simple

## John Deere "Little-Big" Diesel Tractors

John Deere "Little Big" tractors are built to handle a number of jobs, using just a fraction of the fuel often required of larger tractors. They're basic, simple tractors designed for easy upkeep, easy operation. Tractors that take a turn at mowing, loading, digging postholes, dredging ponds, plowing and planting ... then come back for more.

And there are three models to choose from — the 850 with 22-PTO hp, the 950 with 27 PTO hp and the 1050 with 33 PTO hp\*. All have a 3-cylinder wet-sleeve diesel engine ... 8-speed transmission ... differential lock... color-coded controls ... and more. The 3-pt. hitch handles Category 1 implements ... and features load-and-depth control on the 1050. The 540-rpm PTO (continuous-running on the 1050) engages with a conveniently located lever.

The 1050 is turbocharged for more power, smoother operation. Both the 1050 and 950 can be equipped with mechanical front-wheel drive for added traction.

If you need a compact tractor that doesn't require a degree in advanced mechanics to service and operate, see us today. We have a "little-big" tractor, plus the implements you need for your particular operation.

\*Maximum PTO horsepower at 2600 engine rpm for the 850, 2400 engine rpm for the 950 and 1050 by official test.
