

It saves enough in fertilizer costs alone to pay for itself.

**The Slurrystore® system
lets you haul when
you're ready.**

Now store manure
for months.

Then haul and apply it
when you're ready and the
weather is right. You save
labor and time. Your work-
load is easier. You have more
time to manage your dairy
operation...more time for you
and your family.

**Make best use of natural
plant foods in manure.**

A Slurrystore® system re-
tains up to 95% of the N in ma-
nure when it's injected under

After manure is transferred from col-
lection pit to structure, (1) slurry is drawn
out of the structure through a 12-inch
pipe attached to the side-mounted
pump. It may then be (2) pumped into
the center agitator, (3) pumped to the
over-the-top agitation unit, or (4) moved
to the fill pipe for loading into a spreader
for injection or broadcasting after a uni-
form mixture is achieved.

the soil. You save big dollars in
N, P and K. And with all-time
high fertilizer costs, it's no
wonder dairymen every-
where are investing in a
Slurrystore system.

Remember, a Slurrystore
system stops the risks of runoff
and water pollution. It re-
duces odors, improves fly con-
trol and sanitation.

There's a size to fit your
dairy operation — 50,000 to
1.3 million gallons. This is the
right time to ask your
Harvestore system dealer
about a Farm Profit Plan and
tour to show the full potential
of a Slurrystore system.
