

AGRI-EQUIPMENT Has The Systems To Turn Hogs Into SUPERHOGS!

SEE OUR DISPLAY at the **KEYSTONE PORK**

VENTILATION

**Chore-Time Air Systems Gives
You Year-Round, Day-In & Day Out
Comfort For Your Hogs!**

**THURSDAY, 1
At The Host
Route 30 East c**

If your hogs can feel extremes of heat or cold—you're not getting the greatest efficiency from them, or from what you're feeding them. If they're hot in summer, they can't gain efficiently or fast enough. If they're cold in winter, they're burning feed to keep warm.

So you may be **paying** for a modern ventilation system and still not getting one.

Chore-Time's environmental control system is not complicated or difficult to understand if you

realize what it does: It's designed simply to control **air flow** and **air volume** at all times. The result? 1) It evens out temperatures in all parts of a building all year long. 2) It provides comfort during summer's hot, humid weather. 3) It provides healthful air flow in winter, but prevents cold drafts and cold areas in a building.

The result is faster gains, less costly gains, better use of valuable feed, more efficient use of your labor—better profits.

here's how it works

See cut away of typical building above. Static Monitor (A) reads the static pressure in building using bottle (B) mounted in attic or outside of building as a "Dampening chamber." Static Monitor sends signal to (C) Inlet Power Pack which operates (D) Air Inlets. Inlet openings are controlled to maintain the correct velocity of air. System

is designed to 'swirl' air to maintain uniform temperature and humidity in all parts of the building. Fan Control (E) operates Variable Speed Fans (F)—allowing for large air flow in hot weather, minimal flow in cold weather.

Fans serve as 'air pumps' to expel 'spent' air from building at a controlled rate. For hot weather additional fans can be operated by regular thermostats so they turn on or off as needed. Many hog operators also use fans expelled air from manure pit (G) for less odor and manure gases in livestock living areas.

how to keep **SUPERAIR** coming to your hogs

**CATTLE — HOG — POULTRY EQUIPMENT
2754 CREEK HILL RD., LEOLA, PA 17540
PHONE: 717-656-4151**

★ **SERVING PA, N.J. and N.Y.**

**AGRI-EQUIPMENT, INC.
OFFERS COMPLETE SALES,
INSTALLATION, SERVICE**

**STORE HOURS:
Mon.-Fri.
7:30 to 4:30
Sat. 7:30 to 11:30**
