FRISTAMAT VENTILATION

**FRISTAMAT VENTILATION
IN A FARROWING ROOM**

**THE ENERGY
EFFICIENT
FULLY
AUTOMATIC
SYSTEM FOR
LIVESTOCK
AND
POULTRY**

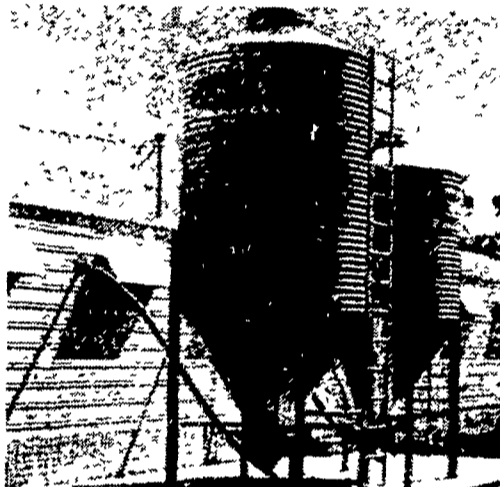

AIR PATTERN and MOVEMENT

This is the key to excellent ventilation. Twelve individual adjustable nozzles control air direction up and down, the length of throw and velocity. The length of throw is crucial in avoiding down drafts at the walls. The velocity ensures proper mixing of air at the ceiling level, uniform temperature and proper air motion at the livestock or poultry level. This air pattern once set never changes.

FEED BINS

With more than 40 models to choose from, Chore Time's line up to feed bins lets you choose exactly what you need — not what somebody wants you to have. They're all completely galvanized (no painted parts) and have other quality features that you need in a bin for long years of trouble free service at low cost.

The SUPERAUGER System For Hogs

genuine **FLEX AUGER.**

**THESE RUGGED
COMPONENTS MAKE
UP THE RUGGED FLEX-
AUGER SYSTEM:**

Auger and Tube for the 3 basic sizes of FLEX AUGER. Auger comes in one continuous piece to fit your specific building.

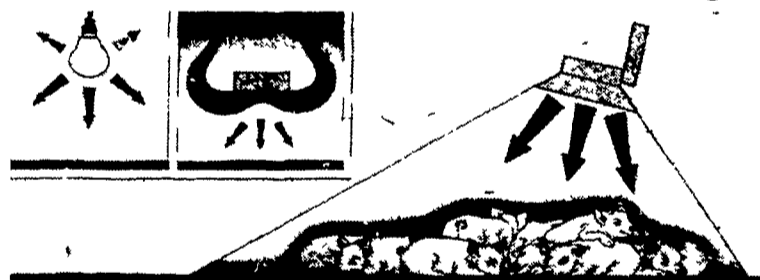

Chore-time POSIFLO™ assures first-in, first-out performance

POSIFLO Feed Flow Control (shown mounted on our 30° single outlet boot) is fully automatic. Its electric motor slowly rotates the disk and metal "whisker" while the auger system runs.

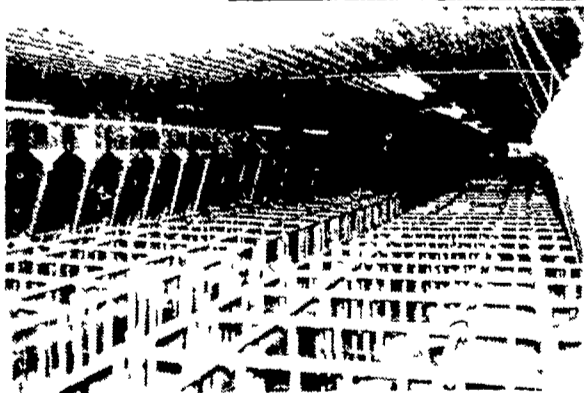

CHORETIME POSIFLO™ FEED CONTROL

SBM BROODERS: Downgoing heat

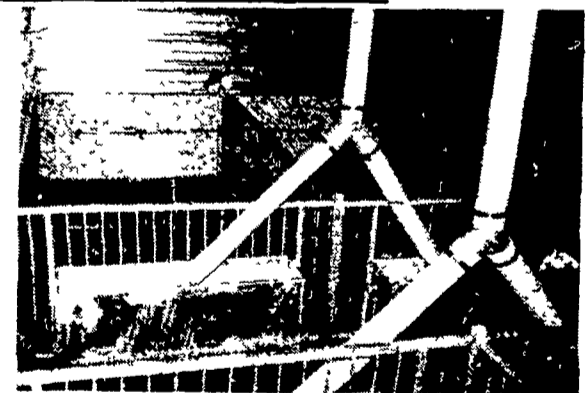

SBM Sunnypig Brooders are powerful and, like the sun, radiate their power down from above: the piglets and floor are kept well heated.
