## MIXER-FEEDERS

Trailer Mixer/Feeder.  
Truck Mounted Mixer/Feeder.  
Models 210, 285, 335

**Total Mixed Rations (TMR)  
For high-performance  
feeding.**

Feeding balanced rations is one thing; completely mixing them is another. With Van Dale Mixer/Feeders you're positive that concentrates, grains and feeds are totally mixed for maximum nutrition. Rations are more palatable when thoroughly blended, and animals can't be selective in what they eat. And you'll know exactly how much of each ingredient you're feeding to help keep costs down. Van Dale offers you high performance equipment to match your production goals and specific needs. Take your choice of Trailer or Truck Mounted Mixer/Feeders. Both are designed for fast and complete mixing, convenient operation and dependable service.
