Magnum Super Plus Silo Unloader

**SUPER PLUS...
SUPER FEATURES**

STAINLESS STEEL CHUTE BACK

Stainless steel provides less sticking, less wear and corrosion than ordinary galvanized or painted chutes. You get better performance and longer life from the Magnum Super Plus Silo Unloader.

OIL BATH DRIVE BOX

We've designed the drive box specifically for the Magnum Super Plus, to provide simple, efficient and low maintenance drive. That means fewer problems, less downtime for you.

HIGH-CAPACITY PERFORMANCE

The Magnum Super Plus has a precision-built 27" impeller and four segments of reverse flighting on the rear auger.

AUTOMATIC LEVELING

Electrically senses and levels high and low spots automatically. Takes an aggressive even cut through hard pack or frozen material yet will not bury itself in soft material. No balance weight to adjust.

SOLID WALL WHEELS

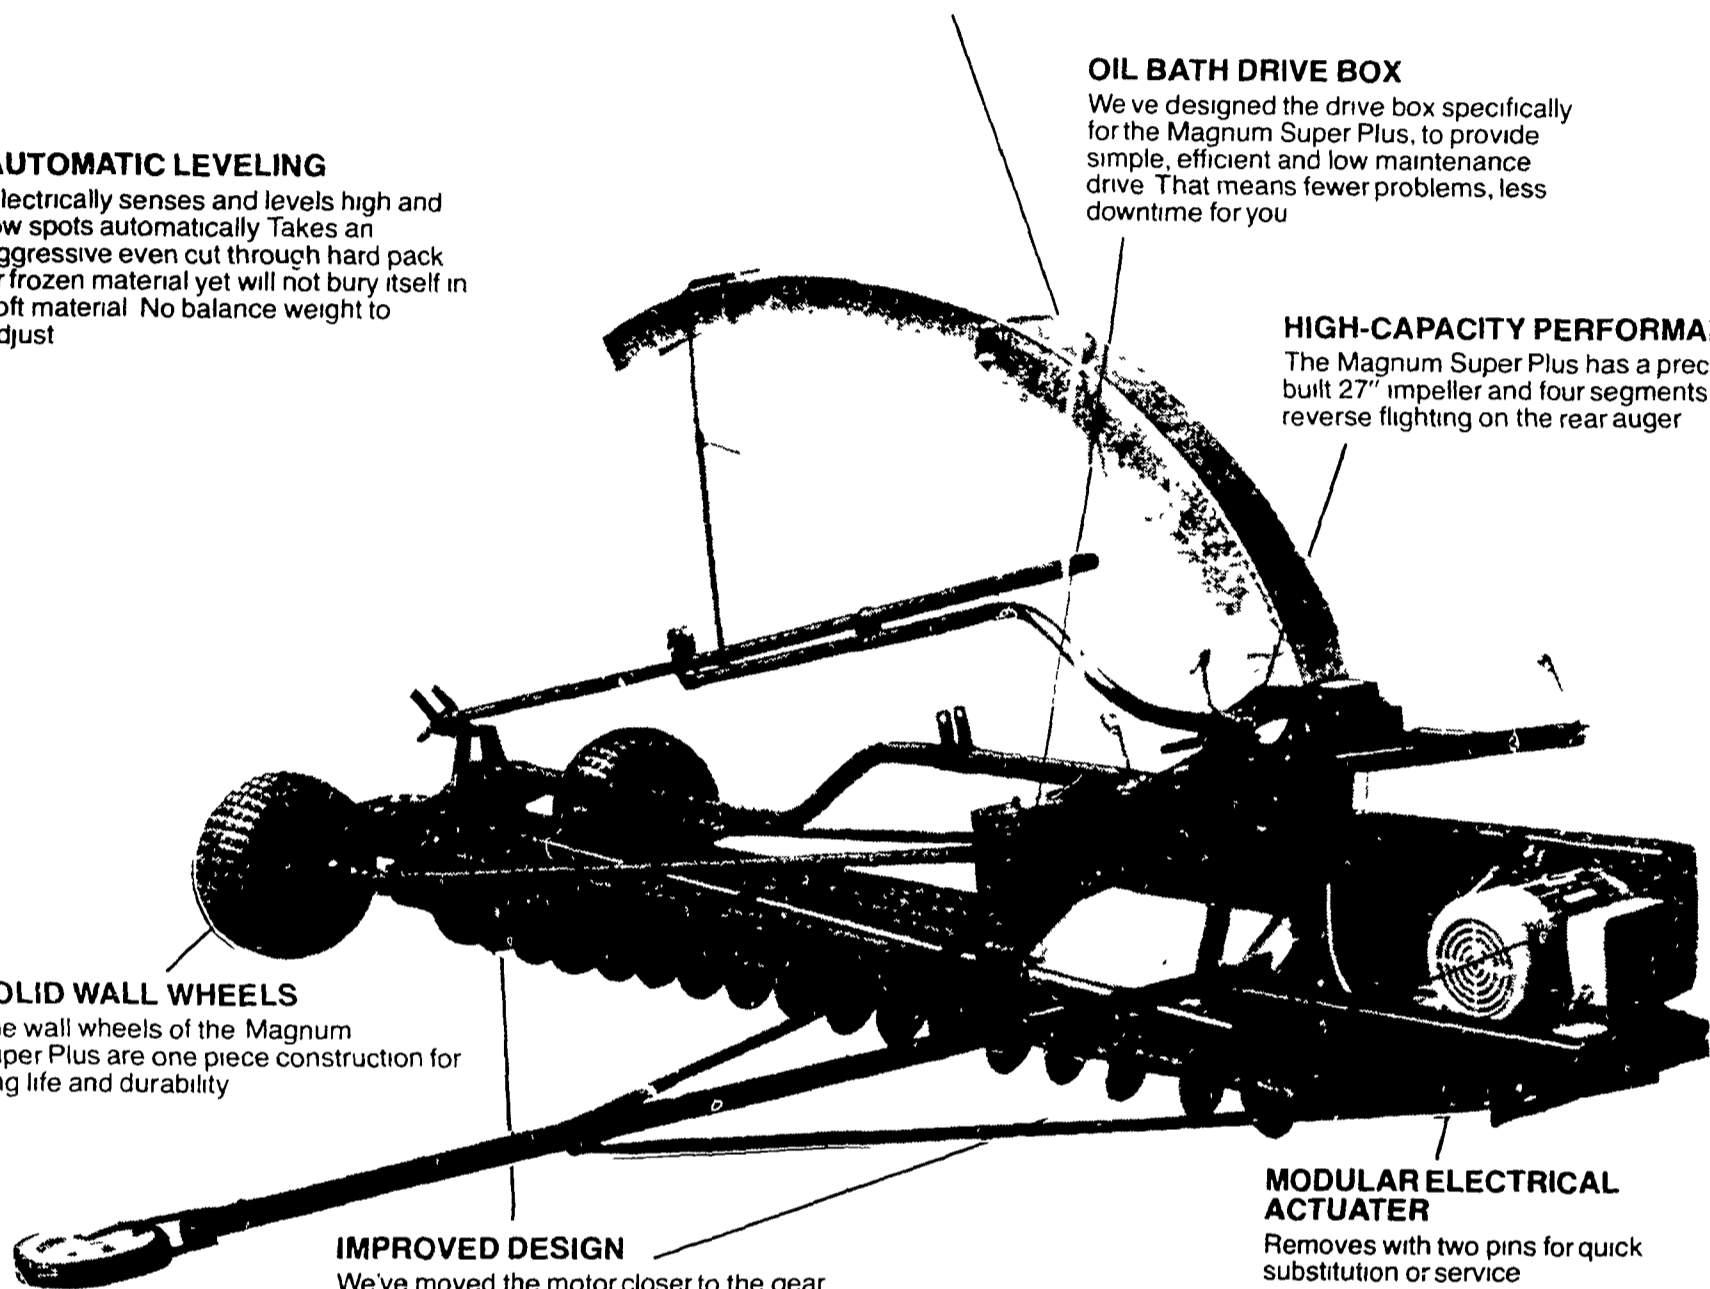

The wall wheels of the Magnum Super Plus are one piece construction for long life and durability.

IMPROVED DESIGN

We've moved the motor closer to the gear box to shorten the belts. And because the balance center is closer to the front, auger surface pressure is increased. Our walking beam concept, with drive wheels closer to the wall, provides better traction and fewer adjustments.

MODULAR ELECTRICAL ACTUATOR

Removes with two pins for quick substitution or service.

VAN DALE

Specifications

Range of sizes	16' 30'	Drive Tires	ATV tubeless, low pressure
HP Required	16 5 HP 18 5 or 7 1/2 HP 20 24 7 1/2 HP 24 30 10 HP	Wall Wheels	solid plastic with nylon bushing
Impeller	27" dia precision clearance 3 cast "V" paddles	Frame Material	structural pipe
Augers	7" lead 8' rear auger 1/4 flighting 56 curved knives per auger standard equipment	Chipper Wheels	reversible straight blade
		Electrical Sensing System	pre wired right angle actuator
		Time per revolution of s/u in silo	20' = 1 rev/5 minutes
		Collector Ring	pre wired precision machines sealed for weather protection
