

"I need every cent I can get from every acre I farm. That's why I plant these Pioneer® brand hybrids."

3535

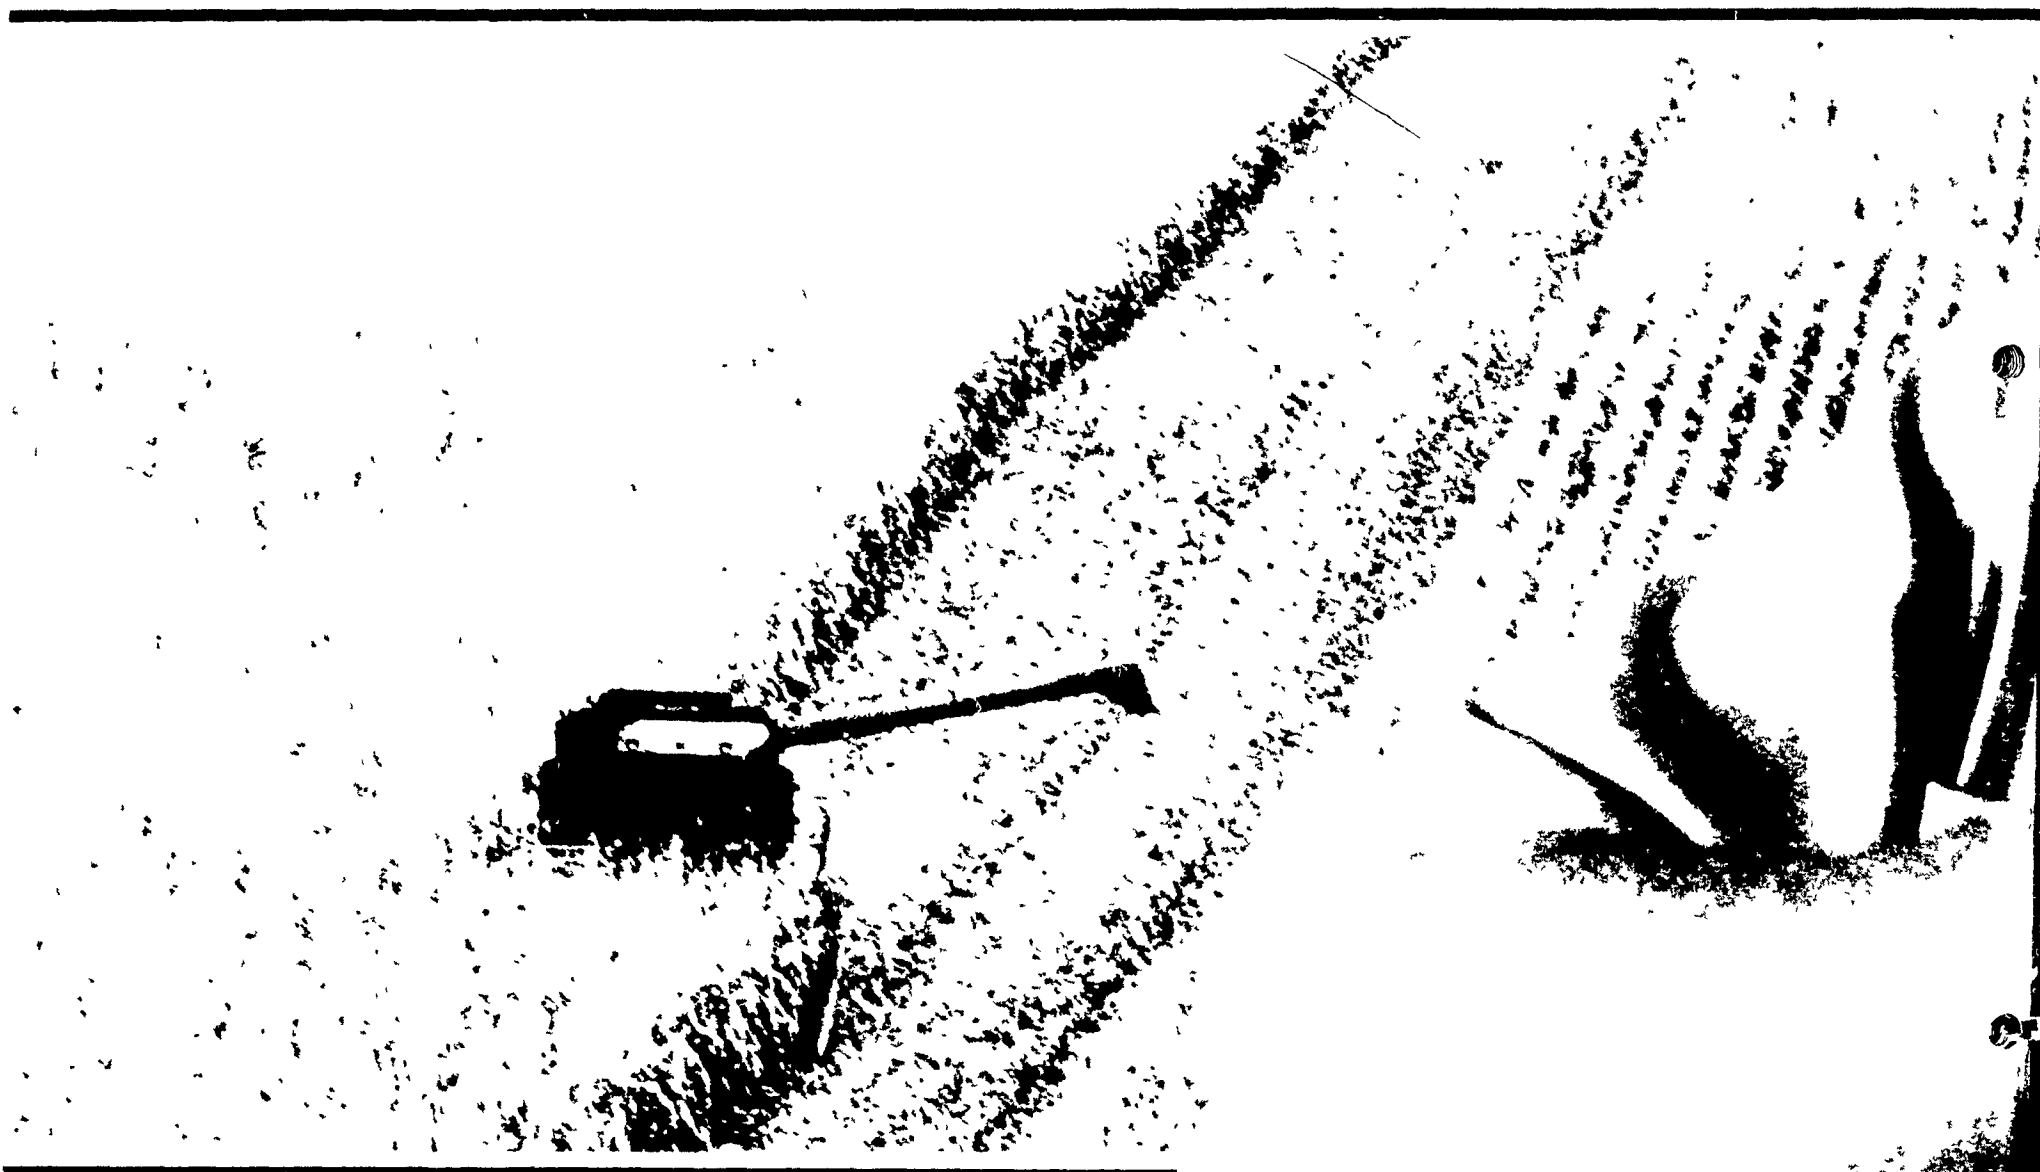

This superior performer has lots of high yield punch. And at harvest 3535 shells out load after load of medium hard-textured, high test-weight grain. It's a real winner under stress of heat, drouth and high population. 3535 is bred to take a lot of punishment and come out on top. This means more corn for you... more money per acre.

3382

Many claims are made about seed corn. Some are sold on promises. But 3382 is sold on tried and true yield performance. This new breed of hybrid has proven big yield potential under modern farming practices. High population and well-fertilized soil really unleash the genetic potential in 3382. It dries fast. Standability is excellent. You'll get your money's worth. Try it.

3184

This hybrid just won't quit when it comes to stalk strength and high yields. There's nothing better than this firmly established leader hybrid in its maturity zone. Farmers really like it around here. It's adaptable to most any soil type or farming practice. 3184 takes drouth and stress. Make sure you include this outstanding hybrid in your planting plans. It's a winner.
