## PUT MORE PROFIT IN YOUR ALFALFA.

Whether you grow for a cash crop or to feed your own livestock, you can't afford weeds in your alfalfa. They shorten stand life, lower protein content, lower TDN and reduce overall digestibility and palatability of your hay. In short, excessive weed growth just plain picks your pocket.

**ORTHO PARAQUAT CL herbicide burns back weeds on contact. Apply PARAQUAT during the winter to dormant established stands. It's exceptionally broad spectrum and destroys weeds with extraordinary speed. Apply PARAQUAT with ORTHO X-77 Spreader.**

**DANGER: PARAQUAT is highly toxic if swallowed and should be kept out of the reach of children. To prevent accidental ingestion, never transfer to food, drink or other containers. Read the label carefully and follow all directions, danger statements and worker safety rules.**

Restricted Use Pesticide. Use all chemicals only as directed.
