## The Farmer Automatic 4 Deck Cage System

A system well devised and constructed for an uncomplicated and economical operation, modern and advanced, it will help you to gain your well deserved maximum return on your investment.

More layers per square foot of building space, more than any other system on the market today, 10,000 layers per 285 cage row

Lower maximum cage height, even lower than most 3 deck systems (6'8" max height, 4'6" max. width)

No special and costly floor or pit construction.

The 4 deck system can be installed in an existing building, without costly conversion or remodeling problems.

Double or even triple your current building capacity

Automatic manure removal, giving an odor free environment, healthier animals, more pleasant and healthier working conditions

Higher bird concentration assures a comfortable, energy saving temperature during cold season.

Summer ventilation is easier to accomplish because of the absence of ammonia and other fumes

**Energy Saving Design**  
 Only 3 fractional horsepower motors per row accomplish the automatic feeding, automatic egg conveying and automatic manure removal

### THE FARMER AUTOMATIC OF AMERICA, INC.

By Reynolds and Yellott Co., Inc.  
 12802 Gores Mill Rd  
 Reisterstown, MD 21136
