

WE'RE NUMBER ONE!

Per Bale or Per Silo Preserve Hay and Haylage Nutrients with BEACON PRE-SERV* Products!

If you use hay by the bale, **Beacon Hay Pre-Serv** lets you bale it at 25% moisture. This allows you to bale earlier in the day, later at night, and well before rain can damage it while drying. Baling at higher moisture levels means you get tougher hay with less leaf shatter . . . hay that cows definitely prefer, with as much as 20% more nutritional value!

If you ensile hay into hay crop silage, **Beacon Silage Pre-Serv** controls the fermentation process by speeding it up. Therefore, a stable silage condition is reached much sooner. Less heat is produced during the fermentation process. The reduced temperatures can lessen the chance of protein being heat-damaged.

That means more nutrients in the haylage where they can be used to make more milk. And that means less feed to buy.

Hay Pre-Serv. Silage Pre-Serv. Both are blends of food-grade mold inhibitors, antioxidants and flavors. They improve palatability and digestibility while they reduce spoilage. And both are easy and inexpensive to apply. Find out more about these great products now. Per bale or per silo, you'll get more milk production, and that means more profits!
