"PLANTING WITHOUT K-MAG IS A LOT LIKE STARTING A TRACTOR WITHOUT A BATTERY."

It's almost impossible to make a tractor work without a battery. Well, you can't expect much better results when a farmer plants crops without adding enough magnesium and sulphur to the soil. It's difficult for them to get started.

K-Mag® not only starts crops right, but helps keep them going at their maximum. All season long. It contains 18% magnesia and 22% sulphur, plus 22% potash. So, when it's mixed with ordinary fertilizers, K-Mag puts back the vital nutrients most of those high-analysis plant foods don't. It becomes...

strengthens soil for growing grain, forage, cotton, tobacco, peanuts, soybeans, fruit, vegetables—whatever a farmer may be planting right now.

For that farmer, the addition of K-Mag pays off in a more profitable yield. For the dealer, it's a happier customer. This means repeat sales. Because K-Mag works the first time and every time it's used. Duval has plenty of details on how K-Mag can help put that important spark of growing life back into soil.
