

## New HM grain storage structure on market

GRINNELL, Ia. — Miraco Mfg., a division of Miracle Recreation Equipment Company, of Grinnell, Iowa, has recently announced the availability of MIRASTOR, a structure for the storage of high moisture grain and forage.

The cool white, condensed fiberglass construction of MIRASTOR insures there will be no heat extremes, maintaining the moisture value of the corn or grain year around. With MIRASTOR there's no chemical reactions, no moisture absorption or ejection from the walls, no expansion or contraction of metals, no liners or coating replacement or repair, no drying expenses, no shrinkage or spoilage, and MIRASTOR is easy to erect.

For more information call or write: MIRACO Mfg., Box 275, Grinnell, IA, 50112, Phone: 515/236-7536

MIRASTOR

This spray gun operates on a siphon tube principle, with no paint flowing through the gun itself.

## Dump treated cow's milk

SHAKOPEE, MN — The dump belt is a marker designed to help prevent the accidental marketing of milk from cows that have been treated with antibiotics.

The bright red plastic marker has a hook that fits snugly around the cow's rear leg above the hock. It is secured firmly with a red web belt. The back side of the marker is molded to fit comfortably against the cow's leg.

The word "dump" is written on the red marker in black as a reminder to discard the milk of the treated cow. Inverted, the dump belt still reads correctly. The marker can be used on either side of the cow.

The marker makes it inconvenient to milk the cow when it's placed on the milking side of the cow. This is a further reminder to dump the milk.

For further information write L & L Markers, Route 3, Box 554, Shakopee, Minnesota 55379; phone 612-445-3869
