

# ROHRER'S

## Distributors for RP forages from NAPB

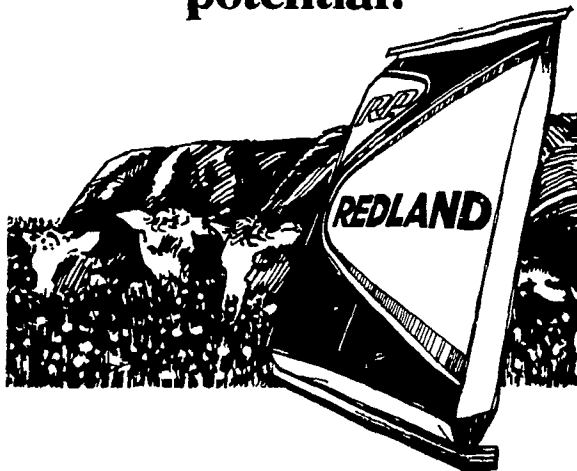

(North American Plant Breeders)

Your first choice  
to beat "wet foot"  
disease

- High Resistance to Phytophthora root rot—"wet foot disease"
- Very high yield potential
- Excellent winterhardness
- Rapid recovery after cutting
- Greater resistance to anthracnose, pea aphids and leafhoppers than most other alfalfas
- Available with GroZone™ Seed Coating

Persistence  
plus top yield  
potential.

- Top quality forage even after typical two-year red clover rotation
- Excellent winterhardness
- Resistance to southern anthracnose
- Tolerance to powdery mildew and northern anthracnose
- Full season performer that comes on early in the spring
- Available with GroZone™ Seed Coating

Ahead in yields  
and anthracnose  
resistance.

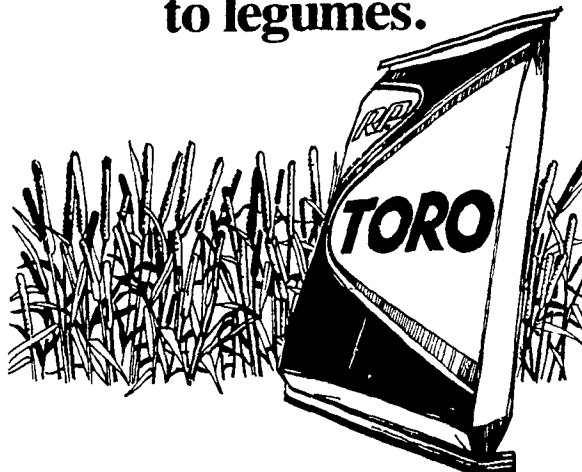

- Fights "summer decline" caused by anthracnose
- Proven yield leader
- Early maturity; fast regrowth
- Good bacterial wilt resistance
- Fine stemmed, leafy forage
- Available with GroZone™ Seed Coating

Consistently  
high-yielding smooth  
brome grass.

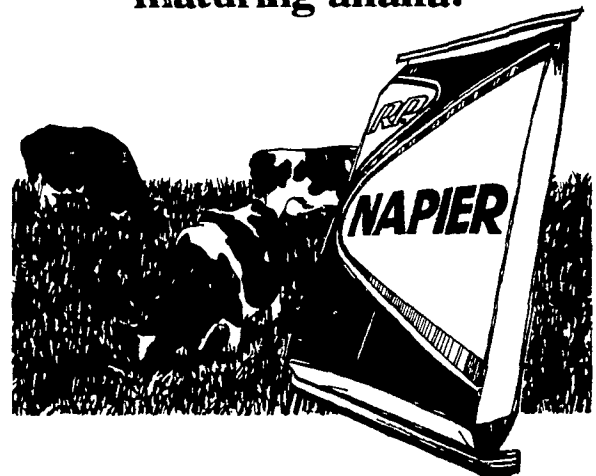

- Extra leafy, quality forage
- Ideal grass for use with legumes
- Broad disease resistance
- Excellent winterhardness
- Good drought resistance

New timothy  
that stands up  
to legumes.

- Early maturing—ideal for use in alfalfa mixtures or straight grass seedings
- High yield potential
- Rapid growth and recovery ability
- Fine-stemmed and extra leafy
- Good leaf disease resistance

Ideal orchardgrass  
to plant with early-  
maturing alfalfa.

- Ideal maturity for easier haymaking
- Outstanding drought resistance
- Fast recovery, high yield potential
- Excellent winterhardness
- Good resistance to leaf blights

### NEW AGRIPRO™ AP-250 Bred to outyield Amsoy 71, Beeson and Woodworth.

AP 250 is ideal for the Amsoy 71 Beeson Woodworth maturity zone. And in five years of yield trials it has consistently outyielded these popular varieties.

But in addition to big yields AP 250 gives you good emergence tolerance to tested races of Phytophthora root rot and good resistance to lodging.

### NEW AGRIPRO™ AP-350 Tests prove it outyields Williams and Mitchell.

AP 350 is a welcome addition to Group IV maturity. It combines overall yield performance superiority with an excellent chlorosis rating plus resistance to race I Phytophthora root rot and tolerance to other tested races. Plus good emergence too. Look at the yield data on this bean. For its maturity it would be difficult to find a better bean.

#### AGRIPRO 25

- Early Group III pureline variety with top yield potential
- Good emergence. Excellent standability
- Resistance to Race 1, extreme tolerance to Race 3 Phytophthora

THINK  
AGRIPRO™
