Fertilizer factories

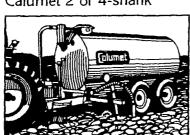

A single 150-lb hog yields about \$1100 of fertilizer value a year. Multiply that by the number of hogs you raise and you have a substantial supply of N, P, K you don't have to buy

But it has to be managed That means the right handling and spreading equipment. Calumet vacuum tanks are built to last with heavy-duty components and a choice of two vacuum pumps — both engineered to load fast and run cool

To get the most value from hog manure, pair your Calumet vacuum tank to a Calumet 2 or 4-shank

soil injector and put manure where it does the most good

Take advantage of the value produced by your living fertilizer factories — with Calumet manure management equipment
