

# GOLIATH™ CHAIN-TYPE UNLOADER

Here's a big-tonnage bottom unloader that cuts through even the toughest feed

This Goliath bottom unloader is head and shoulders above others. It can handle rugged jobs with speed and power. And maintenance is low, too. If service is required, it can be done easily at ground level. There's no climbing or crawling into a tunnel. You can feed and fill at the same time with a Goliath unloader. The first forage in is the first forage out.

**The Goliath unloader cuts feeding time  
...rugged cutter claws cut through the toughest feeds for fast delivery.**

### **ONE MOTOR — NOT THREE.**

Unloaders are powered by just one 7½ horsepower motor.

### **PROTECTED MOTOR CONTROL.**

All controls and electrical components are protected from the weather. Complete motor overload protection is built in.

### **RUGGED SWEEP-CUTTER ARM**

Cutter chain links are built to withstand tensions up to 37,500 pounds.

### **WARRANTY**

2½ YEARS "FULL" WARRANTY ON CONVEYOR AND CUTTER CHAINS.\*

(\* Does not include bolts, nuts, paddles or cutter teeth)

### **TOUGH CONVEYOR CHAIN**

Manufactured to withstand continuous operation at all speeds.

### **TWO-SPEED MAIN DRIVE TRANSMISSION**

The heavy duty two-speed transmission assures easy start up and rapid delivery.

### **EXTRA-STRONG CENTER POST ASSEMBLY**

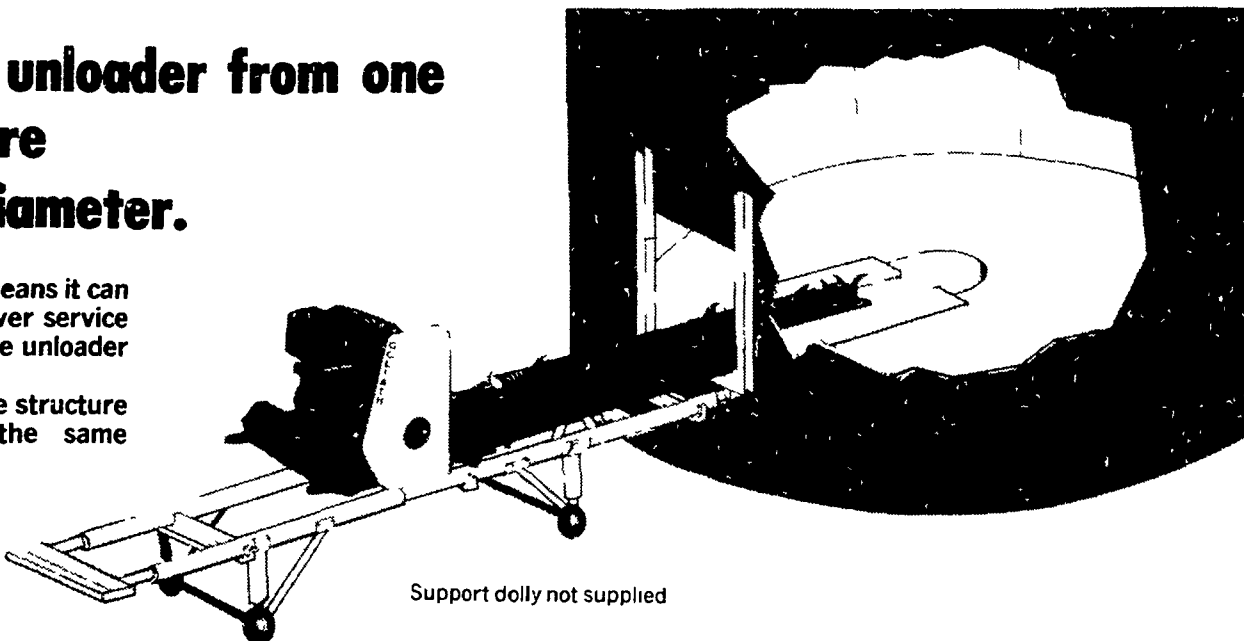

The base casting will withstand shock loads of up to 65,000 pounds per square inch.

**You can move the Goliath unloader from one Harvestore forage structure to another of the same diameter.**

The Goliath unloader is factory assembled. This means it can easily be fitted into Harvestore structures. Whenever service is required it can be easily done at ground level. The unloader stays on the ground, and you do too.

The entire unloader can also be removed from one structure and put into another forage structure of the same diameter...even when both structures are full.

**LOW COST LEASING AVAILABLE**
