

The Early Riser Planter.

Excellent seed to soil contact even in no-till conditions.

Make the most of any kind of soil condition with an IH 800 Series Early Riser Planter. And get your crops off to a better start.

In many soils, you can do your planting in just one pass. Without tilling! The reason is the newly designed staggered double disk opener, so narrow that it moves less soil and penetrates more easily than any other planter. Up to 600 lbs. of down pressure per row can be applied, eliminating the need for special coulters in most soil conditions.

The result is a narrower furrow that retains more moist soil along the sides. Ground hugging twin covering disks positively cover the furrow, trapping each seed in an air-tight pocket of moist soil—ideal seed to soil contact for fast germination and uniform emergence.

The Early Riser Planter can handle tough ground, too. Under extremely tough soil conditions, a new no-till rippled coulters can be added to break ground ahead of the double disk openers on trailing planters. When minimum tillage is desired, the 9/4" disk furrowing attachment moves through trash and clods to help keep seed depth—and germination—more uniform. Naturally, the Early Riser Planter also works superbly with conventional tillage.

Get the Red Edge at your IH Dealer today. Let him show you how the new Early Riser Planter can give you better seed to soil contact for early rising crops.
