

ROHRER'S

Distributors for RP forages from NAPB

(North American Plant Breeders)

**Your first choice
to beat "wet foot"
disease**

- High Resistance to Phytophthora root rot—"wet foot disease"
- Very high yield potential
- Excellent winterhardiness
- Rapid recovery after cutting
- Greater resistance to anthracnose, pea aphids and leafhoppers than most other alfalfas
- Available with GroZone™ Seed Coating

**Persistence
plus top yield
potential.**

- Top quality forage even after typical two-year red clover rotation
- Excellent winterhardiness
- Resistance to southern anthracnose
- Tolerance to powdery mildew and northern anthracnose
- Full season performer that comes on early in the spring
- Available with GroZone™ Seed Coating

**Ahead in yields
and anthracnose
resistance.**

- Fights "summer decline" caused by anthracnose
- Proven yield leader
- Early maturity, fast regrowth
- Good bacterial wilt resistance
- Fine stemmed, leafy forage
- Available with GroZone™ Seed Coating

**Consistently
high-yielding smooth
brome grass.**

- Extra leafy, quality forage
- Ideal grass for use with legumes
- Broad disease resistance
- Excellent winterhardiness
- Good drought resistance

**New timothy
that stands up
to legumes.**

- Early maturing—ideal for use in alfalfa mixtures or straight grass seedings
- High yield potential
- Rapid growth and recovery ability
- Fine-stemmed and extra leafy
- Good leaf disease resistance

**Ideal orchardgrass
to plant with early-
maturing alfalfa.**

- Ideal maturity for easier haymaking
- Outstanding drought resistance
- Fast recovery, high yield potential
- Excellent winterhardiness
- Good resistance to leaf blights

NEW AGRIPRO™ AP-250 Bred to outyield Amsoy 71, Beeson and Woodworth.

AP 250 is ideal for the Amsoy 71-Beeson-Woodworth maturity zone. And in five years of yield trials it has consistently outyielded these popular varieties.

But in addition to big yields, AP-250 gives you good emergence, tolerance to tested races of Phytophthora root rot and good resistance to lodging.

NEW AGRIPRO™ AP-350 Tests prove it outyields Williams and Mitchell.

AP 350 is a welcome addition to Group IV maturity. It combines overall yield performance superiority with an excellent chlorosis rating plus resistance to race 1 Phytophthora root rot and tolerance to other tested races. Plus good emergence too. Look at the yield data on this bean. For its maturity, it would be difficult to find a better bean.

BIG BONUS BEANS

AGRIPRO 25

- Early Group III pureline variety with top yield potential
- Good emergence. Excellent standability
- Resistance to Race 1, extreme tolerance to Race 3 Phytophthora
