

DEUTZ-FAHR. . .

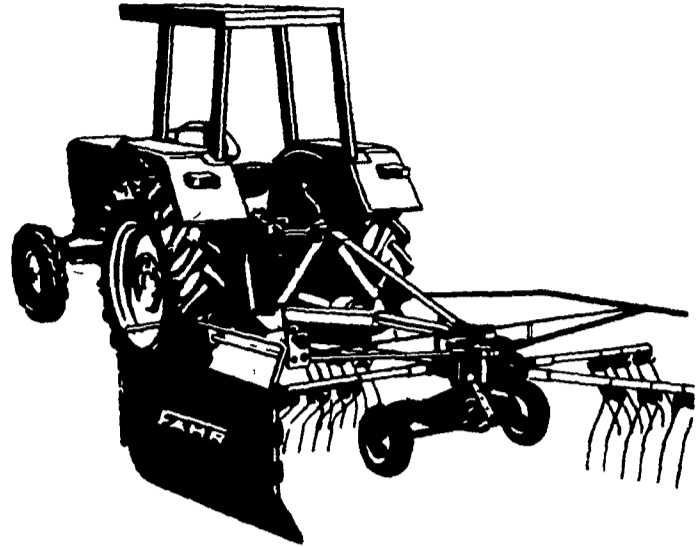

THE GENTLE POWER IN THE HAY FIELD

The hay's down and it rained.

The rains may soak your cut hay, but the Deutz-Fahr Centipede Haymaker can save your crop. It lifts, turns, fluffs, spreads and flexes the stems to release moisture fast. You get fast air-drying, save more nutrients and maintain hay quality.

Stop in soon and check out the new Deutz-Fahr Centipede Haymaker. See why Deutz-Fahr is the gentle power in the hayfield.

More leaves — less tangle.

The circular raking pattern of the Deutz-Fahr Rotary Windrow Rake gives you fluffy, tangle-free windrows that are easy to pick up. Gentle handling saves leaves and stems for higher protein content in your hay.

Stop in soon and check out the new Deutz-Fahr Rotary Windrow Rake. See why Deutz-Fahr is the gentle power in the hayfield.

In 1967, when we first introduced the Fahr Haymaker in the Northeast, some people thought that tedding was a thing of the past. Before long however, those first owners discovered that they just couldn't get the kind of quality hay that they were after without the FAHR.

Since that time nearly 4000 machines have been sold in the Northeast, a small number considering that there have been more Fahr haymakers sold in the world than any other one piece of farm machinery. Ask any owner how many times his Fahr has saved hay that otherwise would have been sold as mulch.

If you can imagine 100 men with pitch forks gently scattering a swath or windrow, not simply turning it but exposing the complete crop to the sun and air to get faster and more complete curing, you get a good idea of what a Fahr Haymaker does.

Fahr Offers The Following Features:

- 16.6/6.50x8-4 ply super baloon implement tires for smooth working in rough conditions.
- Tine loss preventors holds a broken tine in place rather than finding it later in your forage harvester or baler.
- Inclined, adjustable wheels for clearing fence-lines and scattering your hay on your land not your neighbors.
- Optional 2 speed gearbox for respectable raking in a heavy crop or simply "tickling up" a windrow after a heavy dew.
