

**It's the combination
of experience and
equipment to solve
your manure handling
"problems"**

THE RIGHT COMBINATION

841 Kutztown Rd., Myerstown, PA
717-933-4151

1 IN THE BARN		GUTTER CLEANER From the custom delivery chute, to the welded reverse corners... from the big 18" steel fabricated corner wheels to the most reliable power unit in the industry, it's Hedlund throughout. Fits any barn layout.		FREE-STALL CLEANER Dependable, thorough automatic cleaning! The big high-carbon steel scraper blade is curved to keep manure rolling ahead of the scraper. The recessed chain keeps the blade to the floor and is out of the way of cattle. And more!
2 FROM THE BARN		MANURE AS IS The Hedlund Hydraulic Piston Pump moves manure underground to your storage facility. All-weather system. The Hedlund Big Ten Pump delivers the capacity you need for best performance.		MANURE AS LIQUID The Hedlund-Vaughan Chopper Pump quickly chops and blends manure in the reception pit, then pumps slurry to a storage unit. You enjoy easy, full control from the pump platform.
3 FROM STORAGE		EQUALIZER Enjoy fast, efficient loading of manure consistencies ranging from liquids to crusted-sloppy solids. Big capacity through a heavy-duty 12" auger. Big reach with a 22' chute. Normally, the Equalizer will load your spreader in a minute or two. All mounting brackets, including stand, included.		BASIN PUMP Here's powerful, portable slurry-making and loadout efficiency! Adapts to 540 P.T.O. tractors. Built strong! The big, high volume 25" impeller easily breaks up solids, with the special design of the agitating nozzle. You have fingertip hydraulic control throughout.
4 TO THE FIELD		SCAVENGER SPREADER Solids, semi-solids, liquids... even partially frozen manure, the Scavenger is one spreader for the man who thought he needed two! No flails or aprons to break or freeze. Pulverizer paddles break up manure and deliver it to the expeller. Expeller throws uniform coverage to 50 feet. Optional hydraulically-controlled lid and brakes are available.		VANGUARD SPREADER The Vanguard makes quick work of spreading manure consistencies from liquid to semi-solid. It combines the advantages of a conventional spreader and a tank spreader, without the disadvantages. Spiraled paddles break up solids and move manure to a powerful 20" fan expeller. Optional hydraulically controlled lid and brakes are available.

WE BUILD FOR THE DAIRY INDUSTRY
