

**BUY A JOHN DEERE TRACTOR NOW AND SAVE ON FINANCE CHARGES. OR LEASE NOW AND YOUR PAYMENTS WILL BE DISCOUNTED 10%!**

Buy a new John Deere 40- to 257-hp tractor before July 31, 1981, and no finance charges will accrue until March 1, 1982. This same offer applies to all used tractors and new John Deere and used implements sold with the tractor.

If you've considered leasing a tractor, now is the time. Lease payments on new John Deere tractors and implements leased with the tractor will be discounted 10 percent.

Stop in and see us soon. We can help your equipment dollars do more.

**TWO NEW TIME-MIZER SELF-PROPELLEDs FEATURE 40-KNIFE CUTTERHEADS**

Now there are self-propelled forage harvesters that will give you increased productivity and the clean, uniform cut you want. The new 5720 and 5820 Self-Propelleds from John Deere. Their time-saving design starts with the Dura-Drum™ cutterhead...40 segmented knives on a 24-inch-diameter cutterhead cut through thick crop mat hundreds of times every second.

These knives will cut down on repair costs, too. Each knife is individually mounted on slots. They tend to slide back and avoid damage if they hit a hard obstruction. And, you can keep these knives razor sharp with the Dura-Drum knife sharpener. Get that factory-fresh bevel every time you sharpen.

Keep cutting at peak performance with the Quick-Adjust stationary knife. It takes only minutes to get the correct setting. One wrench, a few turns, and you'll be on your way getting that clean, uniform cut you need for increased productivity.

Let us show you the new 210-hp 5720 and 275-hp 5820 Time-Mizer Self-Propelleds.

**New 337's pickup has wider working width**

You talked and we listened. You said you wanted a medium-duty 14 x 18 baler that had the same high-capacity pickup that's on our heavy-duty balers. Well, you've got it. The new 337 Baler from John Deere.

You'll find two more rows of teeth added to the outside edge of this pickup, to give you the extra working width you need in today's wider windrows. In fact, you can't buy a baler that has more teeth than the 156-tooth 337 Baler.

The 337 also has an adjustable compressor that floats right with the pickup to give you consistent compression over bumps and dips. And we improved the 337's knottor to give you the kind of knots that stand up to rough handling.

There's a whole new line of balers waiting for your inspection. Come in today and take a look.

**Versatility PURE AND SIMPLE**

**JOHN DEERE COMPACT UTILITY DIESEL TRACTORS**

John Deere Compact Utility Diesel Tractors are built to handle a number of jobs, with just a fraction of the fuel used by larger tractors. They're basic, simple tractors designed for easy upkeep, easy operation. Tractors that take a turn at mowing, loading, digging post holes, dredging ponds, plowing and planting then come back for more.

There are five models to choose from — the new 650 and 750 Tractors with 14.5 and 18 PTO hp respectively, the 850 with 22 PTO hp, the 950 with 27 PTO hp and the 1050 with 33 PTO hp\*. All have 8 speed transmission, differential lock, color coded controls and more. The 3 point hitch handles Category 1 implements, and features

load-and-depth control on the 1050. The 540 rpm PTO (continuous-running on the 1050) engages with a conveniently located lever.

The 1050 is turbocharged for more power, smoother operation. The 650, 750, 950 and 1050 can be equipped with mechanical front-wheel drive for added traction.

If you need a compact tractor that doesn't require a degree in advanced mechanics to service and operate, see us today. We have a compact utility tractor, plus the implements you need for your particular operation.

\* Maximum PTO hp at 2600 engine rpm for the 650 and 860, 2400 engine rpm for the 750, 950 and 1050. All ratings by official test except for the 650 and 750 which are factory observed.
