Federal dams prevent \$1 million

flood damages in Pa.

HARRISBURG — Three Federal flood prevention dams in the 6county flood disaster area reduced flood damage by \$1 million, according to government conservationists.

According to Graham T. Munkittrick, State Conservationist for the USDA Soil Conservation Service, three dams built for local residents through SCS programs held back floodwaters and reduced damages in several communities.

The town of Sandy Lake in Venango County was spared onehalf million dollars in' flood damage as the dam on Two Mile Run stored five feet of floodwater. The dam stored the equivalent of 1.7 inches of runoff from the drainage area. Storm frequency
