CASE COMPLETES A GREAT NEW TRACTOR LINE

... with new General Purpose tillage/choring models

How do you tell a great new tractor from a good one?

Let a Case 90 Series General Purpose tractor show you with a demonstration on your farm. You'll see new easy controls, new luxury seating, new working visibility and more: features like standard 12-speed synchromesh transmission, high capacity hydraulics, elevating hood for easy servicing, and the impressive performance of Case high economy diesel engines.

You can test MFD — mechanical front wheel drive option for 53 to 90 hp models. In conjunction with standard rear wheel differential lock, MFD greatly increases traction and all-season

productivity without duals. MFD also is an important factor in fuel economy.

You can also enjoy extra quiet comfort in an optional cab for the 1490 and 1690.

Before you make a buying decision, see your Case dealer. Operate and compare the 90 series General Purpose tractors... great for your tillage/choring needs... great new additions to the complete Case line.

U.S. Deputy Ag Secretary visits China

WASHINGTON, D.C. — Deputy Secretary of Agriculture Richard E. Lyng will lead a joint government-industry team of grain specialists to China and will afterward visit Japan and Korea.

Lyng said the team's visit is part of the U.S. Department of Agriculture's intensified campaign to expand U.S. grain exports. The team will meet with representatives of the Chinese government and grain trade to develop specific plans for expanding technical assistance to foreign users of U.S. agricultural products, improving credit programs and determining quantities of U.S. grain to be purchased in the 1981-82 marketing year, Lyng said.

Following his meetings in China, Lyng said he will travel to Japan July 1-4 and to Korea July 4-6 for discussions with government and trade officials on trade matters of mutual interest.

The trade team — which will not accompany Lyng to Japan and Korea — is scheduled to return July 1.

Lyng said China is one of the countries targeted by USDA as having a growing market potential for U.S. grain sales.

"Increased production in competing countries has resulted in increased competition, which the United States plans to meet through new or increased measures to expand foreign markets," he said. "Our objective is to enhance the U.S. reputation as the world's most dependable supplier."

Team members are Harrell Ridley, vice chairman of U.S. Wheat Associates Inc.; E. Thurman Gaskill, chairman of the U.S. Feed Grains Council; Myron Laserson, Continental Grain Co., and LaVerne Becker, FarMarCo, representing the U.S. grain exporting industry; and USDA employees Robert Svec, David Culver and Charles Luu.

In fiscal year 1980, the United States exported about \$900 million worth of grain to China.
