BERG BARN CLEANERS

OUTRUN
OUTLAST
OUTCLEAN
OUTPERFORM

Berg Barn Cleaners are the best you can put in any barn. They're the best in strength, durability and performance. Each chain link is forged, in one piece from special nickel-chrome content steel. No tools required to remove them. The continuous duty motor eliminates over-heating and assures ample power at all times. We could go on and on but better yet, for more complete details, please call us.

BERG HYDRO-MAN MANURE PUMP

MAKES MANURE HANDLING MUCH EASIER

It forces the fresh manure from the barn, through an under-ground pipe to the outside storage area, away from the barn, and you then have manure ready to spread when you are ready to spread.

BERG AIR FLOW

FOUR SEASON VENTILATION TO FIT YOUR OPERATION

PROVIDES FRESH AIR AS NEEDED AND WITHOUT DRAFTS

Proper year-around ventilation can help lengthen the life of your buildings, improve feed efficiency, reduce risk of disease, moderate the effects of temperature extremes and improve comfort for both you and your livestock. Berg Air Flow Ventilation circulates fresh air as needed throughout the year. Most important it releases the air evenly throughout the entire building without drafts. Think of BERG when you think of building ventilation.

Specially forged one-piece chain links measure 7-and-a-half inches, and weigh over 2 pounds. Heavy concentrations of metal at pull points and extra-rugged hooks give Berg Chain Links up to a ton and a half more pull strength than other designs. No wonder gutter chains in the first Berg installations show so little wear after years of daily operation. No wonder so many farmers call for Berg when it's time for replacement. Berg chains and flites will fit all other barn cleaners.
