

Youths attending institute

YORK — Two outstanding boys and girls have been named winners in the Cooperative Business Education Program sponsored by the Adams-Franklin-York Cooperative Council and will represent this area at the Pennsylvania Association of Farm Cooperative Summer Youth Institute at Shippensburg State College Sunday to Wednesday.

Those named to attend the Institute are Robert Livingston, Dover; and Michele Bankert, Hanover.

Winners were selected on the basis of their knowledge of the business enterprise system in America, the cooperative way of doing business, and on activities of the participants identifying them with school, community, church, and youth organizations.

The Institute program is designed to teach youth more about the business enterprise system in the United States, to help in planning their future by pointing out career possibilities in agribusiness, and providing opportunities for individual leadership development.

Approximately 150 young adults, representing the best of over 4,000 participants in the annual P.A.F.C. youth education program, will attend the four-day conference.

Climax of the Institute will be the selection of delegates to attend the American Institute of Cooperation's annual youth conference at Colorado State University, July 27-30.

There they will join with 500 other future leaders from the United States, Canada, and Puerto

Conservation district tour

FLEMINGTON, N.J. — The Hunterdon County Soil Conservation District is sponsoring its annual bus tour on Saturday, July 18.

Rico to take part in activities at the national meeting.

The Shippensburg Institute is a joint effort of the Pennsylvania Association of Farmer Cooperatives, local cooperative councils, and the College of Agriculture of The Pennsylvania State University.

The conservation of water and its use will be the theme of the tour for this year. Some of the interesting stops on the tour will include:

—Hunterdon Hill Holsteins, Rosemont, where tour participants will see a unique system for the distribution of the manure on the land.

—Richard Gulick Farm, Rocktown, where no-till corn and a number of water conservation practices are in use.

—Ernest Kuster, Copper Hill,

where visitors can look over his grain sorghum, grow in place of corn. Sorghum is a more drought tolerant crop and is comparable in feeding value to corn.

—Herman Panacek, Quakerstown, and his recently installed drip irrigation system for nursery crops.

There will be a number of other conservation practices observed as the tour progresses. For more information about the tour contact: the Hunterdon County, New Jersey, Soil Conservation District Office at 201/782-3915.

Available in 15' diameter

Madison® System of Choice

...more from your acres, hours, dollars.

Madison System of Choice helps you produce more high-quality, nutrition-packed feed from every crop you grow. Madison silos for corn silage, Madison Nutri-Matic and Grain-O-Matic (both atmosphere-controlled, bottom-unloading structures) for haylage and high-moisture grain. All at prices today's value-minded livestock farmers demand.

Call us today! We'll show you how the Madison System of Choice gives you more from your acres hours and dollars

HAVING SOIL PROBLEMS?

Here's A Timely Tip...

Be sure you apply enough

The new higher-powered fertilizers often require more lime each application to maintain a neutral soil that tests to pH7.
