

## USDA cites Pa. produce firm

PALM — Confs, Inc., has been cited by the U.S. Department of Agriculture for failing to pay promptly for tomatoes it purchased for its processing operations.

USDA's Agricultural Marketing Service, which licenses produce firms under the Perishable Agricultural Commodities Act, had charged the firm with failing to make full payment for 250 lots of tomatoes worth \$165,928. The tomatoes were purchased during August and September, 1979.

Charles Brader, marketing official with AMS, said the firm had the opportunity to answer USDA's charges, but failed to respond.

USDA's Administrative Law Judge William J. Weber ruled that the firm had committed willful,

flagrant, and repeated violations of the act.

Under Weber's order, the firm is ineligible to conduct business subject to the act until May 1983, and then only if a PACA license is obtained. The firm's officers and directors — James L. Price, George H. McLaughlin, and Samuel J. Schreffler may not be employed by or affiliated with any PACA licensee until May 1982, and then only if a surety bond is posted

and USDA approves. Also, the firm's sole major stockholder, American Specialty Foods, Inc., may not be affiliated with any PACA licensee during the same period.

Under PACA, all interstate traders in fresh and frozen fruits and vegetables must be licensed by USDA. USDA is authorized to suspend or revoke a trader's license for violating the act.

## Farm Talk

(Continued from Page D6)

questions about farm problems and farm policy. As indicated, they may not be typical, but they are important. Some of them and the organizations they belong to will be in Washington over the next several months making sure farm policies get written that suit them.

It seems almost inevitable that large farms will get larger and more and more small farms will be gobbled up by developers and other farmers.

But at the same time, it does seem possible that Uncle Sam will

write some laws that could change all that. There is a body of evidence summarized in the USDA farm structures report that indicates continuing the trend toward larger farm units may not be all that good for agriculture or for America. And there seems to be a growing national concern about farmland preservation and soil stewardship.

Perhaps all of these factors will come together in a new farm bill with some totally new approaches to some of agriculture's problems.

# Volumatic® III silage distributor-unloader by JAMESWAY®

## Fast unloading

Another reason why all ring-drive silo unloaders are not alike: Big 26-inch diameter impeller pours out silage. Easily converts from rigid to swinging paddles in minutes to match silage conditions. Features abrasion resistant steel rim; removable top for easy access ... easy to service.

See us for systems and service that help make the good life better.

## 200-bushel capacity. Gleaner dependability.

The L2 Gleaner Combine from Allis-Chalmers Built with the 200-bushel capacity and the dependability needed to get you through your harvest.

Compare it with competitive combines. The unique Gleaner Combine Sure-Feed System and down-front cylinder assures high-speed harvesting. No over-threshing or under-threshing with complete control of the crop at all times.

Exclusive concave door stone protection protects the cylinder from damaging rocks and foreign objects.

Plus, its 2-stage threshing, 3-stage separation and 2-stage cleaning mean gentle grain handling for high harvesting efficiency.

Compare threshing, separation, cleaning, capacity, feature-for-feature. Now you can get the better designed features and standard equipment of a Gleaner Combine you've always wanted. With the dependability you can count on.

Gleaner Combines from Allis-Chalmers are better by design. Gleaner is an Allis-Chalmers trademark.
