

You're always under a lot of pressure to harvest a lot more number ones. Fact is, Bravo 500 fungicide can help you do just that. Bravo 500 delivers higher yields of better quality tubers.

Here's proof. Bravo was tested for 7 years against the other leading fungicides under varied growing conditions. Results: potatoes sprayed with Bravo on a regular schedule produced an average of 9 cwt. more per acre than the competition. Against untreated checks, the difference in production with Bravo was an incredible 57 cwt. more per acre.

Talk to growers who start the season with Bravo 500 and stick with it right up to harvest.

You'll find them in every major potato growing area, getting better harvests year after year. And for controlling early blight, late blight and Botrytis vine rot, nothing matches Bravo 500 effectiveness. Especially when disease pressure is high.

Bravo 500 can be applied by ground rig or by air. It is also labeled in 12 states for application through sprinkler irrigation systems to control specific potato diseases.

When it comes to performance that pays off, Bravo 500 is a hard act to beat.

Bravo 500. Wherever healthy potatoes are grown, it's the name that keeps cropping up.
