Gypsy Moth

(Continued from Page A34)

can make fairly accurate projections of the spread of the insect and population levels in specific areas," Bystrak said. Control efforts to be undertaken next spring will in large measure be based on data collected as a result of the trapping efforts. Property owners are requested to cooperate with the trapping program by leaving the traps undisturbed until they are picked up. Questions concerning the trapping program can be directed to Bystrak at (301) 269-2957.

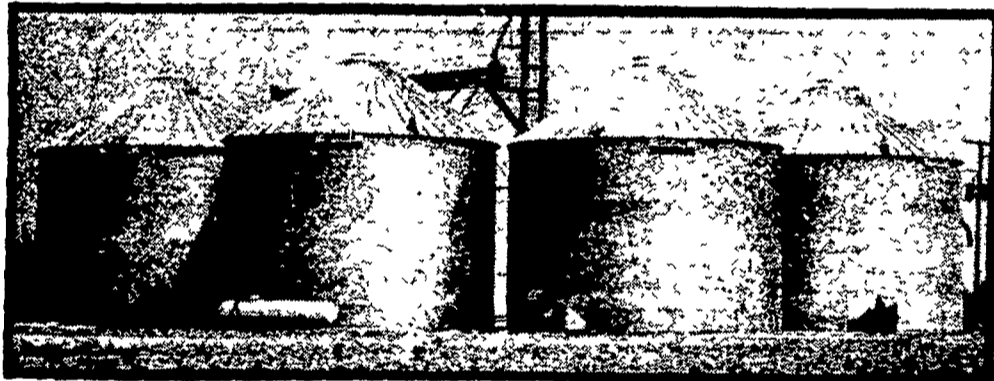

This section of Harford County, Maryland, depicts the defoliation caused by damaging gypsy moths—Maryland Farmer photo.

BODMIN NU-PULSE SYSTEM

★ For Parlors, Pipelines and Pail Milkers

READ WHAT YOUR NEIGHBORS ARE SAYING ABOUT AMERICAS NU-PULSE MILKERS

Lynn J. Struphar
 Annville, PA

I milk 30 cows. Since installation of my Nu-Pulse system, I have experienced faster and more complete milkouts. The cows udders are much softer and more pliable. Since using this system I have had only one new case of mastitis and very low bacteria counts, especially like the simplicity of the pulsators and the single line hookup.

Keener's Dairy
 Dry Run, PA

The longer we use the Bodmin, the more we like it. The positive aspects of this milker certainly outweigh the negative aspects. For us the Bodmin is here to stay.
