

Furadan at seeding time.

For a better stand that can pay back four dollars for every dollar you spend.

That's the kind of stand that gives you a lot more alfalfa.

Based on field tests in Pennsylvania, Maryland and Virginia, Furadan® insecticide at seeding saved an average of more than $\frac{1}{3}$ ton of alfalfa an acre per cutting. That can mean almost \$75 an acre more for you per season—figuring alfalfa at \$85 a ton.

With Furadan, you protect your new crop from leafhoppers and blotch leafminers. Right from the start.

So if you're out to turn alfalfa into a real money-maker, put down Furadan insecticide

at seeding. And see the difference in your yields.

That's Furadan—either 10G or 4 Flowable. From FMC Corporation, Agricultural Chemical Group, 2000 Market Street, Philadelphia, PA 19103.

A Section 24C special local needs registration has been granted for Furadan in the following states: Pennsylvania, Maryland, Virginia, Delaware, New York, New Jersey, W. Virginia, New Hampshire and Connecticut.

Furadan 4 Flowable is a restricted use pesticide. Furadan is a registered trademark of FMC Corporation.
