remove most of the heat from the water, lowering temperatures to where it can be returned to the river flow at near normal coolness.

Inevitably, audience questioning turned to the accident at Metropolitan Edison's Three Mile Island nuclear plant, located about 40 miles north along York County's Susquehanna's shore.

Calling the TMI accident the "Murphy's Law of nuclear," (anything that can possibly go

wrong, will), Tucker added the plant's operators had received numerous indications of problems, but didn't really know what they were seeing, and couldn't believe what the monitoring instruments were telling them.

While a myriad of potential problems that could happen to nuclear plants had long ago been postulated by nuclear energy engineers, the string of unlikely occurrences, mishaps and failing back-up systems that culminated in the TMI accident had simply

never been dreamed possible, he added.

"The atomic energy industry was not ready for TMI," Tucker concluded, calling nuclear electricity generation the second-safest industry in the country. "We like to think that we are prepared

for that now."

Participants in the annual regional Ladies Day Out included PFA members from Berks, Chester, Delaware, Lancaster, Juniata and York Counties. Kay

Taylor, chairperson of the York Women's committee, headed up program arrangements, with assistance from members of advisory councils in the southeast part of the county.

The two boiling water nuclear reactors at Philadelphia Electric's Peach Bottom Atomic Plant can each generate a capacity of 1,055,000 kilowatts of electricity. In 1979, Unit 2 set a free world record for a single power unit, generating over 8.5 billion kilowatt hours.

Penn State Extension engineers win awards

UNIVERSITY PARK — Three Cooperative Extension Service agricultural engineering specialists at Penn State have been named recipients of blue ribbon awards presented by the American Society of Agricultural Engineers "for the development of noteworthy educational aids."

The 1981 awards were announced during the society's recent annual meeting held in Orlando, Florida.

The competition is designed to encourage specialists to strive for excellence in Extension activities through the interchange of ideas on

successful educational methods and teaching techniques.

N. Henry Wooding won a blue ribbon for his publication, "Wastewater Management and Disposal for Milking Centers and Milk Handling Facilities."

Dennis J. Murphy won awards for three fire safety education publications: "A Basic Guide Book," "Fire Protection in Your Community," and "Preventing Fires."

James W. Garthe received a blue ribbon for a slide set, "Alcohol Fuel Production: There's More to it Than You Think."

AGRI-EQUIPMENT INC. IS PROUD TO ANNOUNCE THEIR DISTRIBUTORSHIP OF

Delphi

Built With All The Long-Life Features You've Always Wanted

ROTARY HOG FEEDERS

Model R3-100
3 bu. cap.

Model R6-100
6-bu. cap.

Farmcraft Multi-Purpose FEED CART

Has One-Person BABY PIG HOLDER

Not just a feed cart that holds up to 130 lbs. of feed, but also a 'help with every job' cart. The right width for even the narrow 24 in. aisles in some confinement buildings. Moves easily on inflated balloon tires and swivel casters. When you have to do inoculating, vaccinating, tail clip ping, ear notching, castrating, etc. it's easier, using the one person baby pig holder.

Farmcraft Tender-Care Woven Wire Flooring

REDUCES STRESS by Providing a Dry & Warm Environment. Makes 3-Week Weaning Practical

Woven wire has long been the preferred flooring in Europe. Since we introduced it in the U.S. scores of enthusiastic hog breeders have told us how much better their pigs are growing on it. It's because this flooring stays dry - no horizontal flat surfaces for moisture to accumulate. Pigs of all ages more secure. Fewer foot and leg abrasions. Our woven wire flooring has a heavy galvanized finish and gives more years of service.

FOR PIGS OF ALL SIZES

- IN STOCK
- 5 GAUGE
- 4'x8' SHEETS
- 5'x7' SHEETS

Farmcraft Enduraglas® Coated TROUGH Feeders

Assemble Segments To Any Length Desired
