

"MILK POWER" TWINNS

Hi-O Cow Chow 36

Purina Dairy scientists have produced many outstanding Dairy rations through the years, but none offer a greater milk-making potential than Hi-O Cow Chow 36. This "super performing" supplement contains 36% protein. When mixed with grains according to Purina Research approved formulas it produces a "super" energy milking ration.

It is the unique scientific blending of a carefully calculated balance of proteins, minerals, vitamins and extra high energy milk-making ingredients that provides Hi-O Cow Chow 36 with its unusual power to produce extra milk.

Use Hi-O Cow Chow 36 for on-the-farm mixing or let your Purina dealer Check-R-Mix a Purina milking ration for you containing Hi-O Cow Chow 36. He has specific formulas to make a quality milking ration with the right protein level to fit your roughages and your herd.

Cow Chow 36BF II

To Minimize Butterfat Problems

Purina Cow Chow BF II is the concentrate to use for top feeding with high moisture corn or in your grind and mix rations when you have a depressed butterfat problem.

It helps minimize butterfat depression while providing the balanced nutrition needed to produce a nutritionally balanced milking ration for maximum milk production.

Use Cow Chow BF II in rations to be fed to cows consuming over 25 pounds of milking ration per cow per day or eating more than 8 pounds of concentrate per cow daily.

Grind and mix rations made with Cow Chow BF II should be fed according to your roughage program.

Lancaster County Dairy Breakfast Meeting Schedule

Sponsored By Ralston Purina and Your Lancaster County Purina Dealers
