1. SMOOTH AC WELDING

Operates at energy-saving low voltage, producing a smooth, non-stick arc with the lowest priced welding rod. For general purpose work on mild steel.

CALL KEN BURKHART For The Time & Date Of Our Next WELDING CLINIC

2. FORCE-AC WELDING

Special high voltage, produces a forceful 9000° flame with carbon arc torch attachment for heating and brazing (Eliminates need for costly acetylene welding equipment) Simplifies welding light aluminum with TIG welding attachment Speeds up fabrication of new steel with 7014 iron powder rods Runs any AC welding rod made

3. STRAIGHT POLARITY-DC WELDING

Makes hardsurfacing implements fast and easy for 3 to 5 times more wear This use alone can save more than the cost of the welder Lets you braze sheet metal to heavy steel using a single DC carbon and brazing rod Produces perfect welds on light stainless steel with TIG torch attachment

Stock No. 110-078-000. Includes instruction book, wall receptacle, wide vision helmet, electrode cable and holder, ground cable with clamp. (Shown with optional High Frequency Arc Stabilizer).

4. CUTTING TAP

Performs like a 400 amp welder for the cleanest cutting of any type metal (Cuts at less than 1/10th of the cost of acetylene equipment) Saves you money by not overheating the welding rod and allowing you to use full length for cutting Drills holes in heavy metal or hard-to-reach spots Powerful enough to blow (gouge) a groove in heavy metal while still on equipment which eliminates removing parts to bevel with a grinder

5. REVERSE POLARITY-DC WELDING

With built-in pressure to hold weld in place Even beginners can now weld overhead and vertical as easy as flat Runs the low hydrogen rods easily for the strongest welds on tubular high carbon steels used in today's equipment Makes stronger, better welds on expensive cast iron parts Lets you arc or rivet weld sheet metal to repair broken spot welds or patch worn sheet metal from one side Runs flux coated arc aluminum rod for repair of heavy aluminum
