

Keep a good crop with Vigortone Silage Granules

Even your best forage loses valuable nutrients during natural fermentation. But, by limiting the amount of nutrient-robbing heat in your silo, Vigortone Silage Granules help maintain feed-value. Laboratory tests showed that alfalfa haylage treated with silage granules retained 65% more protein than untreated haylage. And Total Digestible Nutrients (TDN) of corn silage increased 7% over untreated.

Make feed go farther

Proper use of Vigortone Silage Granules allows you to harvest earlier at higher moisture levels. Wasteful runoff is reduced, and palatability preserved.

Vigortone Silage Granules can pay for themselves many times over (only 1 pound needed per ton silage) This year, keep your crops nutrient-rich. See your Vigortone dealer today.

We help you make a better feed.
