MILKERS TO THE WORLD

Westfalia is high capacity RPS 2800 Vacuum Pump

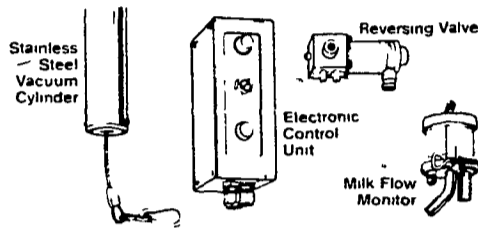

We're talking about high capacity milking with any milking operation. And we're talking about uninterrupted vacuum supply up to 100 cfm ASME (2890 l/m). Westfalia Systemat's new RPS 2800 Vacuum Pump System brings you smooth, efficient airflow extra bearing strength positive power transmission with multiple V-belt drive.

An extra big advantage the RPS 2800 takes widely available SAE HD#10 motor oil. You've got a choice of 5, 7½ or 10 hp motor for single- or three-phase operation. And you can buy only what you need — the pump alone (with or without motor and oil reclaimer) — or the complete RPS 2800 Vacuum Pump System, base-mounted and ready-to-go. You just can't beat it.

All items made of stainless steel

"With Westfalia ACR it's like having an extra hired hand."

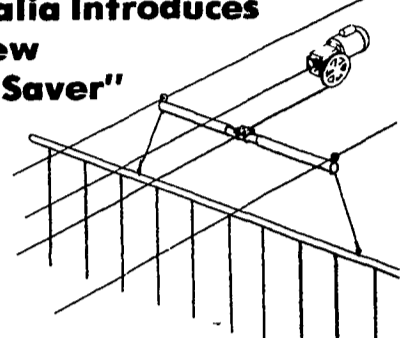

Save up to 50% in man-hours.

The Westfalia Automatic Cluster Remover can save you time and money while minimizing the threat of mastitis.

All you do is prepare the udder, switch on the ACR, attach the cluster and that's it. The ACR works with any system. When milk flow drops off it automatically allows for stripping action to get all the milk. Then the ACR shuts off vacuum, pauses and gently detaches the cluster.

Westfalia Introduces the New "Time Saver" Crowd Gate

"Effectively Cuts Milking Time by 10%"

• Safe • Efficient • Economical • Easy to Install & Operate. The new Westfalia "Time Saver" Crowd Gate is the newest in the line of Westfalia dairying equipment. Westfalia has combined precision design with a modern effective method of sound and electrical impulses to guide cows into prep stalls and/or milking parlors. All cows respond to this proven method of physical response.

Westfalia Precision Vacuum Regulator

VACUREX 2400

Westfalia's highly sensitive Vacurex vacuum regulator responds in milliseconds to pressure deviations in any milking machine system. And it corrects minute changes automatically with servo control accuracy (85 CFM ASME Rating). Air flow is stabilized over a wide range of pressures supplying optimum vacuum to each milker. Furthermore, Vacurex is easy to install, easy to adjust, and easy to maintain.

"A new superior cluster for precise milkout."

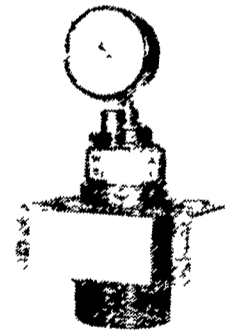

Westfalia Systemat introduces a new milking cluster. Designed for clean, fast, GENTLE, milking and minimum machine strip, this cluster will save you labor and money while promoting good udder health.

Here is a true collection of efficient technical devices. It's all business with large inflation inlets for maximum milk flow, large outlets to take milk away, full visibility claw lets you use it with confidence. Special cushion grip allows for easy handling and wide spread inlet for high producing cows.

VACUREX 5000

Westfalia's VACUREX 5000 gives precise vacuum control automatically, eliminating deviations from your present level. The unique, servo controlled VACUREX 5000 covers a wide range of pressures, responds to any vacuum changes and initiates corrective action in milliseconds. VACUREX 5000 fits any milking machine system and is easy to install, adjust and maintain.
