Better than ever seeding performance

International 5100 Grain Drill

The secret is in the Seed Cup and the Depth Control Wheels

1. Fluted roll, molded of oxide coated sintered metal, is tops for precision, smoothness and resistance to corrosion. It's well-supported at both ends, and precisely aligned for accuracy. It turns extra easy, and won't freeze up during idle periods.
2. Shut-off block of sintered metal, is also precision-molded for accuracy.
3. Fluted washer fits over the roll and mates closely with it. It's cadmium-plated to prevent corrosion, keep it like new for years.
4. Insert acts as a positive bearing surface to surround and support the fluted washer, reduce wear.

Depth Control and press wheels aid in faster seed germination
