Better than ever seeding performance

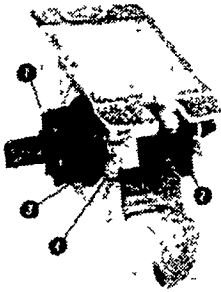

International® 5100 Grain Drill

IN STOCK BUY TODAY DRILL TOMORROW

The secret is in the Seed Cup and the Depth Control Wheels

1. Fluted roll, molded of oxide-coated sintered metal, is tops for precision, smoothness and resistance to corrosion. It's well-supported at both ends, and precisely aligned for accuracy. It turns extra easy, and won't freeze up during idle periods
2. Shut-off block of sintered metal, is also precision-molded for accuracy
3. Fluted washer fits over the roll and mates closely with it. It's cadmium plated to prevent corrosion, keep it like new for years
4. Insert acts as a positive bearing surface to surround and support the fluted washer, reduce wear.

Depth Control and press wheels aid in faster seed germination.

It is with regret that we take this method of letting our loyal customers know that we will no longer be representing Sperry New Holland in this area.

Due to the poor crops in our area in the past few years, our sales for New Holland were not enough for them to continue Stanley A. Klopp Inc. as a dealer. This was particularly sad news for us since their automatic baler was sold here before they were even made by New Holland Machinery Co.

We were old fashioned enough to believe we could sell and service in our own area and not infringe upon other dealer territories and still maintain our sales volume. However, New Holland verbally informed us we were to be terminated for lack of sales and our contract expired August 31, 1981.

Warranties will still be honored on machinery owned by us and sold to customers.

If there is anything we can help you on in machinery, don't hesitate to give us a call.

STANLEY A. KLOPP, INC.
