The **JET STREAM** daughters have dairy quality with flat, clean bone, and well attached high quality udders. Look for him to be an improver of center support, teat size and shape, and fore and rear udders.

His flatbone characteristics set to the leg, width of rump and width of pelvic and thigh area along with his dairy strength makes him a fine mating for **ELEVATION** and **ASTRONAUT** daughters. A cross that should produce outstanding results.

The **CHAIRMAN** daughters are also sharp and dairy with outstanding udders. Their fore udders are strong and smoothly attached. They have outstanding center supports and teat size, shape and placement. Use **CHAIRMAN** to improve dairy-ness and udders on cows, with good substance of bone.

JET STREAM and **CHAIRMAN** semen is available from Sire Power Representatives throughout the world. If your AI Representative doesn't have Sire Power semen available, ask him to contact us. Phone 717-836-3168.
